John Walter was born in the small town of Scotsdale, Pennsylvania. As a child, he was highly active in sports, and was the captain of the Scotsdale Soccer team from 2005-2007. Unfortunately, an injury to his knee prevented him from playing further. He then continued to be active in other athletic activities, including tae kwon do and lacrosse. As he progressed through middle and high school, he became very interested in the intersection between medicine and sports, and started to become more involved with activities on campus through which he could further explore these two fields.

As a sophomore in high school, John was elected to be President of the Robotics Club, where he headed a group of over thirty students in self-teaching and guided activities to construct robots for a variety of uses. John utilized his time to not only increase awareness of the club, but also organized the first successful trip to the Newfalk Robotics Competition in the history of the club. The club won first place in 2015 for their successful completion of an underwater robot that could be used to retrieve objects. This experience gave John an important lesson in leadership and inspired him to continue in the field of robotics.

Currently, John is a high school senior looking to complete a computer science degree at an accredited undergraduate institution the upcoming year. He has attained AP Distinguished Scholar status, and has completed over 12 AP courses to date. Additionally, he is still the President of the Robotics team, as well as being active in the school's Habitat for Humanity organization which provides shelter and food for the homeless. John hopes to use his degree and skills in robotics to construct more advanced prosthetics for athletes suffering from or healing from permanent sports injuries.
