Prior Knowledge Questions (Do these BEFORE using the Gizmo.)

A **prism** is a transparent object that can be used to bend, or **refract**, light. The photo below shows what happens when sunlight passes through a prism.

1. What do you see?

A prism/pyramid made of glass with white light entering from the left, and rainbow light escaping from the right

2. What does this indicate about the composition of sunlight?

Light is able to bend.

Gizmo Warm-up

The *Basic Prism* Gizmo allows you to investigate how a prism refracts light. The Gizmo shows a laser emitting a beam of light through a triangular prism.

To begin, check that **Single color beam** is selected, λ is 500 nm, n is 1.50, w is 2.0, and the angle (θ) is 0° .

1. What do you notice about the path of light when it passes through the prism?

the light curves downward when it passes through the prism.

2. Move the λ slider to increase and then to decrease the **wavelength** of the beam of light.

- A. How does this affect the color of the light ray?

the smaller the nanometer of light is, the darker the color.

- B. How does this affect the direction of the light ray?

the smaller the nanometer, the light starts to angle more downward, while the higher the nanometer, it starts to curve upward.

The Textbook and the Lecture Norm Friesen, 2017-12-15 Why do the basic technologies of education the book and the lecture endure in our digital age Why are the fundamentals of education apparently so little changed in our era of digital technology Is their obstinate persistence evidence of resilience or obsolescence Such questions can best be answered not by imagining an uncertain high tech future but by examining a well documented past a history of instruction and media that extends from Gilgamesh to Google Norm Friesen looks to the combination and reconfiguration of oral textual and more recent media forms to understand the longevity of so many educational arrangements and practices Friesen examines the interrelationship of reading writing and pedagogy in the case of the lecture and the textbook from their premodern to their postmodern incarnations Over hundreds of years these two forms have integrated textual oral and more recently digital media and connected them with changing pedagogical and cultural priorities The Textbook and the Lecture opens new possibilities for understanding not only mediated pedagogical practices and their reform but also gradual changes in our conceptions of the knowing subject and of knowledge itself Drawing on wide ranging scholarship in fields as diverse as media ecology and German language media studies Foucauldian historiography and even archaeological research The Textbook and the Lecture is a fascinating investigation of educational media

Research for Educational Change Jill Adler, Anna Sfard, 2016-06-17 Research for Educational Change presents ways in which educational research can fulfil its commitments to educational practice Focussing its discussion within the context of mathematics education it argues that while research generated insights can have beneficial effects on learning and teaching the question of how these effects are to be generated and sustained is far from evident The question of how to turn research into educational improvement is discussed here in the context of learning and teaching hindered by poverty and social injustice In the first part of the book four teams of researchers use different methodologies while analysing the same corpus of data collected in a South African mathematics
