

HOW BACTERIA & VIRUSES ENTER THE BODY

BACTERIA

To cause disease, pathogenic bacteria must gain access into the body. The range of access routes for bacteria includes:

- 💡 Cuts
- 💡 Contaminated food or water
- 💡 Close contact with an infected person
- 💡 Contact with the feces of an infected person
- 💡 Breathing in the exhaled droplets when an infected person coughs or sneezes
- 💡 Indirectly, by touching contaminated surfaces - such as taps, toilet handles, toys and nappies.

VIRUSES

Spread from one person to another by

- 💡 Coughs
- 💡 Sneezes
- 💡 Vomits
- 💡 Bites from infected animals or insects
- 💡 Exposure to infected bodily fluids through activities such as sexual intercourse or sharing hypodermic needles
- 💡 Forgetting to wash your hands after handling pets and animals is another way for germs to be taken in by mouth.

Viruses And Bacteria Guided
