Graffiti and Street Art Konstantinos Avramidis, Myrto

Tsilimpounidi, 2016-12-08 Graffiti and street art images are ubiquitous and they enjoy a very special place in collective imaginary due to their ambiguous nature. Sometimes enigmatic in meaning, often stylistically crude and aesthetically aggressive, yet always visually arresting, they fill our field of vision with texts and images that no one can escape. As they take place on surfaces and travel through various channels, they provide viewers an entry point to the subtext of the cities we live in while questioning how we read, write, and represent them. This book is structured around these three distinct albeit by definition interwoven key frames. The contributors of this volume critically investigate underexplored urban contexts in which graffiti and street art appear, shed light on previously unexamined aspects of these practices, and introduce innovative methodologies regarding the treatment of these images. Throughout the focus is on the relationship of graffiti and street art with urban space and the various manifestations of these idiosyncratic meetings. In this book, the emphasis is shifted from what the physical texts say to what these practices and their produced images do in different contexts. All chapters are original and come from experts in various fields such as Architecture, Urban Studies, Sociology, Criminology, Anthropology, and Visual Cultures, as well as scholars that transcend traditional disciplinary frameworks. This exciting new collection is essential reading for advanced undergraduates as well as postgraduates and academics interested in the subject matter. It is also accessible to a non-academic audience such as art practitioners and policymakers alike or anyone keen on deepening their knowledge on how graffiti and street art affect the ways urban environments are experienced, understood, and envisioned.

Collaborative Methods Kaylan C. Schwarz, Claudia Mitchell, Rebekah Hutten, 2025-10-16 Collaborative Methods explores the intersections between participatory data analysis and feminist research traditions that complement each other but are rarely examined together The chapters highlight two key approaches methods where participants help analyze the data they contributed to and non hierarchical collaborative methods involving research teams Contributors demonstrate how to choose an approach that best aligns with one s research questions study context and participant availability and interest They also encourage scholars to thoroughly describe their methodological designs decision points and processes rather than keeping the focus only on their findings Through a feminist lens the authors present a range of perspectives resisting a singular approach Instead they engage with the fluid and contested nature of feminist research each author drawing on different feminist traditions to shape their work The volume encourages scholars to think critically about the co production of knowledge making it an essential resource for social science researchers and students who are invested in feminist and participatory methodologies Contributors Nesa Bandarchian Rashti Emma C Cognet L Rebeca Esquivel Jessica Fields Sarah Flicker Geetanjali Gill Jillian Grace Goyeau Nadha Hassen Rebekah Hutten Terra L ger Goodes Meegwun Logan Catherine Malboeuf Hurtubise Mitchell McLarnon Claudia Mitchell Milka Nyariro Kathryn Kendal Ryan Kaylan C Schwarz Grace Skahan Catherine Vanner Angelina Weenie Dawn Wiseman 4theRecord Team
