Clinical Neuropsychology Study Guide and Board Review Kirk J. Stucky, Michael W. Kirkwood, Jacobus Donders, 2014
The Clinical Neuropsychology Study Guide and Board Review provides an easy to study volume with sample questions and recommended readings that are specifically designed to help individuals prepare for the ABCN written examination. In addition, this book can also be used as a teaching tool for graduate students and trainees at various levels. The book is divided into three sections: Section I Foundations of Clinical Neuropsychology, Section II Fundamentals of Assessment, and Section III Disorders and Conditions. The format is geared toward exam preparation and is much less dense than a typical textbook. Materials are provided in a concise, outlined manner with liberal use of bullets, boxes, and illustrations, tables that allow readers to easily review and integrate information into their already established knowledge base. To augment the study guide, a recommended readings list at the end of each chapter provides references to more comprehensive materials considered important or seminal in each topic area.

Literacy and Learning Brett Elizabeth Blake, Robert W. Blake, 2002-11-15. A state-of-the-art compendium of resource materials and current practice that answers two basic questions: What is literacy and how do individuals become literate? Not long ago literacy simply meant knowing how to read and write. Today the study of literacy is a complex field encompassing many different areas from computer literacy to geographic literacy and including several degrees of competence such as functional, pragmatic, and cultured. In addition, there are six kinds of readers: the submissive, the active, the semiotic, the subjective, the psychoanalytic, and the interpretive community reader, and at least two distinct ways of reading: aesthetic reading and rational reading. In this comprehensive, accessible volume, two literacy experts not only help readers understand the latest theories and the heated controversies in this exciting field; they also show readers how this vast new knowledge is being applied in successful literacy programs.

Hunting Serial Predators Grover Maurice Godwin, 2008. Written by a leading expert on the subject, the Second Edition of *Hunting Serial Predators* describes the empirical process used to analyze serial murderers' crime scene actions, making it possible to form logical decisions about how to detect and apprehend serial killers. In this new edition, Dr. Maurice Godwin provides the reader with a model of the crime scene actions of American serial murderers based on information available to a police inquiry. This text also gives an overview of the related scientific knowledge, introduces a new method to classify the serial predator, and provides accounts of the process and difficulties of profiling the serial murderer. By presenting a
