

POSITIVE AND NEGATIVE INTEGERS

Zero is neither positive nor negative.

- A number is **positive** if the number is above zero.
- Positive numbers are written with no sign or a "+" sign in front of them.
- They are counted up from zero to the right on a number line.

- A number is **negative** if the number is below zero.
- Negative numbers are always written with a "-" sign in front of them.
- They are counted down from zero to the left on a number line.

Tip: Always look at the sign in front of a number to see if it is positive or negative.

Positive numbers get higher the further we move to the right, so 5 is more than 2. Negative numbers get lower the further we move to the left, so -5 is less than -2.

Story Problems Using Positive And Negative Integers

ML Morrison

Story Problems Using Positive And Negative Integers:

Thank you very much for reading **Story Problems Using Positive And Negative Integers**. Maybe you have knowledge that, people have search numerous times for their favorite books like this Story Problems Using Positive And Negative Integers, but end up in harmful downloads.
