Scouting and Scoring Christopher J. Phillips, 2021-03-30 An in depth look at the intersection of judgment and statistics in baseball Scouting and scoring are considered fundamentally different ways of ascertaining value in baseball Scouting seems to rely on experience and intuition scoring on performance metrics and statistics In Scouting and Scoring Christopher Phillips rejects these simplistic divisions He shows how both scouts and scorers rely on numbers bureaucracy trust and human labor to make sound judgments about the value of baseball players Tracing baseball s story from the nineteenth century to today Phillips explains that the sport was one of the earliest fields to introduce numerical analysis and new methods of data collection were supposed to enable teams to replace scouting with scoring But that s not how things turned out From the invention of official scorers and Statcast to the creation of the Major League Scouting Bureau Scouting and Scoring reveals the inextricable connections between human expertise and data science and offers an entirely fresh understanding of baseball

Redefining Sports Media Jason Kido Lopez, 2023-05-29 This book argues that the examination of sports media within cultural and media studies is organized around more than just a shared topic mediated sports What count as sports media in journals books and conferences are extremely diverse they can cover athlete expression on social media shoe commercials gender in sports commentary Indigenous name change activists and fantasy sports Besides being mediated and in some cases loosely connected to sports events and leagues it is hard to see what they all share that could serve as the foundation for a unified field of study Jason Kido Lopez argues that sports media are defined by genre which is reflected in their industries within their content and by their audiences Throughout the media and cultural complex sports and sports media are built on the genre of live and real competition and therefore to study sports media is to study that genre Each chapter will explore how the genre is constructed in commodification of mediated sport representation within sports media athlete expression sports fandom and gaming around sports This book will be of interest to those studying sports media as well as media and cultural studies but also can be used as an introductory survey of the research on sports media from a media and cultural studies perspective **Reasoning with Sabermetrics** Gabriel B. Teaching Statistics Using Baseball Jim Albert,2022-02-04 Teaching Statistics Using Baseball is a collection of case studies and exercises applying statistical and probabilistic thinking to the game of baseball Baseball is the most statistical of all sports since players are identified and evaluated by their corresponding hitting and pitching statistics There is an active effort by people in the baseball community to learn more about baseball performance and strategy by the use of statistics This book illustrates basic methods of data analysis and probability models by means of baseball statistics collected on players and teams Students often have difficulty learning statistics ideas since they are explained using examples that are foreign to the students The idea of the book is to describe statistical thinking in a context that is baseball that will be familiar and interesting to students The book is organized using a same structure as most introductory statistics texts There are chapters on the analysis on a single batch of data followed with chapters on comparing batches of data and relationships There are chapters on probability models and on statistical inference The book can be used as the framework for a one semester introductory statistics class focused on baseball or sports This type of class has been taught at Bowling Green State University It may be very suitable for a statistics class for students with sports related majors such as sports management or sports medicine Alternately the book can be used as a resource for instructors who wish to infuse their present course in probability or statistics with applications from baseball The second edition of Teaching Statistics follows the same structure as the first edition where the case studies and exercises have been replaced by modern players and teams and the new types of baseball data from the PitchFX system and fangraphs com are incorporated into the text
