Strategic Implications of the Evolving Shanghai Cooperation Organization Henry Plater-zyberk, 2015-02-11 The role of the Shanghai Cooperation Organization SCO in regional politics and the significance of the organization for U S interests are widely misunderstood The organization is emphatically not a military bloc and yet engages in joint activities which resemble military cooperation to U S eyes It is in theory open to new members but at present is highly unlikely to accept any Its rhetoric firmly opposes U S presence and activity on the territory of member states and yet individual member states leverage basing agreements with the U S to their advantage The author reviews SCO s history and stated aspirations and measures these against actual achievements He concludes that with the notable exception of the Regional Anti Terrorist Structure RATS the great majority of SCO accomplishments are of little significance other than to provide an additional multinational vehicle through which China and in particular Russia can seek to counter U S and Western activity in Central Asia

**Strategic Implications of the Evolving Shanghai Cooperation Organization** U. S. Army U.S. Army War College Press, Strategic Studies Strategic Studies Institute, 2015-01-01 Key points from this analysis include The Shanghai Cooperation Organization SCO is an enduring association which was originally brought together by the short term border security interests of its first five members Russia believes it plays a leading role in the SCO in fact however the organization is and always has been driven by China and Moscow s role is vital but secondary The other member states former Central Asian Soviet republics with no history of modern statehood or governance are not equal partners but their geostrategic location and in some cases natural resources make them potentially valuable allies for the United States and other major powers The SCO is unlikely to enlarge further Since its inception the SCO has received several applications for membership However any enlargement of the organization could be fraught with difficulties mainly because of conflicts of interest between China and Russia and the fear by member states that some new candidates are potential international liabilities and may create further conflict within the organization

*China's Regional Relations in Comparative Perspective* Steven F. Jackson, 2018-02-06 China's relations with its neighbors have evolved since 1949 and in the 21st century many scholars argue that China's rising power has led it to be increasingly domineering over those smaller countries in Northeast Southeast Central and South Asia The evolution of China's regional relations needs to be examined comprehensively since China counts twenty seven countries as its neighbors large and small While China's official policy toward all of these countries is to treat them as good neighbors and partners some of these relationships have been spectacularly deteriorating while others have been quietly improving over the last two decades Jackson takes a comparative foreign policy approach and compares China's status as a regional hegemon with the United States Russia India Brazil South Africa and Nigeria The result is a broader theory as to why regional powers are sometimes intimidating and at other times accommodating An important contribution to studies on China this book will prove useful to scholars and students in Chinese and Asian foreign policy comparative foreign policy and international relations

The Shanghai Cooperation Organization and Conflict De-escalation James MacHaffie, 2023-03-10 This book's main objective is to determine the role if any the Shanghai Cooperation Organization SCO plays in de-escalating tensions among its members It argues that the SCO is uniquely suited to keep its disparate members many of whom have border disputes with each other from escalating tensions among themselves The book proposes a rivalry de-escalation model that differs from the standard belief that rivalries de-escalate due to a shock or external pressure This model states that trust can be built between two rival states when confidence building measures are instilled and utilized repeatedly over a long period of time The SCO provides these mechanisms in the form of annual summits between state leaders and routine military exercises involving military units from every member Examining three case studies involving the founding six members of the organization the book argues that the SCO is effective in keeping rivalries de-escalated among its members This book will be of much interest to students of Asian politics regional security and international relations

*Changing Patterns of Warfare between India and Pakistan* Rizwana Abbasi, Muhammad Saeed Uzzaman, 2023-05-12

*Changing Patterns of Warfare between India and Pakistan* analyzes how advanced nuclear technologies and the advent of disruptive technologies have affected the evolving conflict between India and Pakistan. Advanced nuclear technologies such as nuclear submarines, aircraft carriers, ballistic missile defence systems, BMDs, multiple independently targetable re-entry vehicles, MIRVs, anti-satellite weapons, ASAT, and disruptive technologies such as hypersonic weapons, artificial intelligence, AI, lethal autonomous weapons, LAWs, unmanned aerial vehicles, UAVs, drones, and space-based and cyber technologies have all complicated crisis dynamics and the domain of warfare in the region. Further, the employment of India's compellence strategy is an indication of a change in its stance that demonstrates smart surgical strikes are now more likely. The phenomenon of surgical strikes raises the question of how disruptive technologies will be used to gain direct/indirect military control and hence challenge the existing status quo and deterrence stability. Against this backdrop, the authors predict how this conflict may develop in the future and evaluate the ways to stabilize deterrence and regulate the militarization of artificial intelligence and disruptive technologies between India and Pakistan. This book will be of interest to all those researching and working in the fields of security studies, strategic studies, nuclear policy, deterrence thinking, and proliferation/non-proliferation aspects of the nuclear weapons programme within South Asia and beyond. It will also be relevant for the academic community, policy makers, diplomats, members of international non-governmental organizations, INGOs, professional research institutes, and organizations working on India-Pakistan relations.
