

WEEK – 1

BUILDINGS-LOAD BEARING WALLS INCLUDING DETAILS OF DOORS AND WINDOWS

OBJECTIVE:

To draw load bearing walls including details of doors and windows .

COMMAND USED : Limits , Zoom , Units , line , offset, fillet, trim , break, Arc , copy , rotate , move , hatch , extend, erase, text , Osnap .

PROCEDURE :

1. The limits are set before starting the drawing. The lower left corner is set as default(0.0000, 0.0000). The upper right corner is changed as per our requirements.
2. By using units command, set the types as decimal/precision as 0.0000 and units to scale drag and drop content as millimeters. By using line command, the outer line of the plan is drawn with the required dimension
3. By using offset command, the outer line of the plan is drawn with the required dimension By using offset command, the wall thickness of the plan is given as per requirements.
4. By using trim command the excess lines are trimmed.
5. By using line command, each room is drawn as per requirements.
6. The lines that cannot be trimmed using trim command are eliminated by break command.
7. Using arc command, the doors are drawn as per the requirements of each room.
8. Using copy command, the doors are copied if necessary multiply copy is used.
9. Using rotate command, the doors are rotated as per the required placement for each room.
10. Using move command, the doors are moved and fixed in the place on where it should be placed.
11. Using rectangle command and offset command, the window is drawn separately as per the required dimensions. By changing the line type from continuous to dashed lines, the sun shades and ventilators are drawn. The windows, ventilators and sunshades are copied, rotated and moved and placed in the required place. Using offset command, the plinth line is drawn.
12. The elevation is drawn by extending the outer line of the plan using extend command and unwanted lines are erased using erase command. The doors, windows, sunshade and parapet are drawn in same distance in elevation as drawn in same distance in the plan. The section is drawn on the adjacent side of the elevation by extending the lines.
13. The various representations of brickwork, sand filling and concrete are completed in the section using hatch command. Using save command, the file having plan, elevation and section is saved by giving the corresponding path name.

RESULT:

The load bearing walls including details of doors and windows for a building is drawn using AutoCAD.

General Catalog Iowa State University,1917 The Forensic Laboratory Handbook Procedures and Practice Ashraf Mozayani,Carla Noziglia,2010-12-14 Forensic science has come a long way in the past ten years It is much more in depth and much broader in scope and the information gleaned from any evidence yields so much more information than it had in the past because of incredible advances in analytic instruments and crucial procedures at both the crime scene and in the lab Many practices have gone digital a concept not even fathomed ten years ago And from the first collection of evidence to its lab analysis and interpretation to its final presentation in court ethics has become an overriding guiding principle That s why this new edition of this classic handbook is indispensable The Forensic Laboratory Handbook Procedures and Practice includes thirteen new chapters written by real life practitioners who are experts in the field It covers the tried and true topics of fingerprints trace evidence chemistry biology explosives and arson forensic anthropology forensic pathology forensic documents firearms and toolmarks This text also addresses an array of new topics including accreditation certification ethics and how insects and bugs can assist in determining many facts including a margin of time of death In the attempt to offer a complete and comprehensive analysis The Forensic Laboratory Handbook Procedures and Practice also includes a chapter discussing the design of a laboratory In addition each chapter contains educational requirements needed for the discipline it covers Complete with questions at the end of each chapter brief author bios and real crime scene photos this text has risen to greet the many new challenges and issues that face today s forensic crime practitioners **Complex Steel Structures**

Terri Meyer Boake,2020-08-24 Complexity in architecture construction and material manipulation is constantly increasing due to our present ability to design calculate and fabricate an extending range of geometric shapes and systems This volume addresses the design of complexity in the planning fabrication and construction of steel structures based on non orthogonal geometries curved and chaotic geometries poly diagrid systems lattice grid structures and others Topical photographs by the author on a wide range of international projects present innovative methods and techniques providing an excellent understanding of the possibilities and requirements of complex steel structures **Laboratory Management** ,1963

Concrete Structures Subjected to Impact and Blast Loadings and Their Combinations Chunwei Zhang,Gholamreza Gholipour,2022-05-08 Although much research focuses on investigating the responses of reinforced concrete RC structures under sole impact or blast loads the responses of RC structures under a combination of impact and blast loads currently represent a gap in our knowledge The combined actions of impact and blast loadings may be applied to RC structures during accidental or intentional collision of vessels vehicles etc carrying explosive materials A comprehensive study on the vulnerability of various structural members is carried out using finite element FE simulations under combination of impact and blast loads with the variations of various loading and structural related parameters and key parameters This book introduces various structural analysis approaches for concrete structures when subjected to extreme loads such as impact

and blast loadings The theory of the combinations of impact and blast loads is proposed that can provide primary insights to the specific readers to develop new ideas in impact and blast engineering including combined actions of extreme loads arising from real world intentional or accidental events This book will be of value to students undergraduate or postgraduate engineers and researchers in structural and civil engineering and specifically those who are studying and investigating the performances of concrete structures under extreme loads
