

The Three Little Pigs

Read the story and answer the questions on the next page.

Once upon a time, there were three little pigs who set out to seek their fortunes. Before they left home, their mother warned them to build strong houses to protect themselves from the big bad wolf.

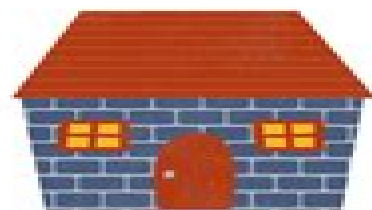

The first little pig built his house out of straw because it was the easiest thing to do. The second little pig built his house out of sticks. It was a bit stronger than the straw house, but still not very sturdy. The third little pig worked hard and built his house out of bricks.

One day, the big bad wolf came along. He knocked on the door of the straw house and said, *"Little pig, little pig, let me come in."* The first little pig answered, *"Not by the hair on my chinny chin chin!"* So the wolf huffed and puffed and blew the house down! The first little pig ran to the second pig's house made of sticks.

The wolf followed and knocked on the stick house's door. *"Little pig, little pig, let me come in,"* he said. The second little pig replied, *"Not by the hair on my chinny chin chin!"* So the wolf huffed and puffed and blew the stick house down! The two pigs ran to the third pig's brick house.

The wolf followed them and knocked on the brick house's door. *"Little pig, little pig, let me come in,"* he said. The third little pig answered, *"Not by the hair on my chinny chin chin!"* So the wolf huffed and puffed, but he couldn't blow the brick house down. He tried and tried, but the house was too strong.

Finally, the wolf gave up and went away. The three little pigs lived happily ever after in their strong brick house.

New Literacies around the Globe Cathy Burnett, Julia Davies, Guy Merchant, Jennifer Rowsell, 2014-07-11 The increasing popularity of digitally mediated communication is prompting us to radically rethink literacy and its role in education at the same time national policies have promulgated a view of literacy focused on the skills and classroom routines associated with print bolstered by regimes of accountability and assessments As a result teachers are caught between two competing discourses one upholding a traditional conception of literacy re iterated by politicians and policy makers and the other encouraging a more radical take on 21st century literacies driven by leading edge thinkers and researchers There is a pressing need for a book which engages researchers in international dialogue around new literacies their implications for policy and practice and how they might articulate across national boundaries Drawing on cutting edge research from the USA Canada UK Australia and South Africa this book is a pedagogical and policy driven call for change It explores studies of literacy practices in varied contexts through a refreshingly dialogic style interspersed with commentaries which comment on the significance of the work described for education The book concludes on the conversation developed to identify key recommendations for policy makers through a Charter for Literacy Education

Deixis in Narrative Judith F. Duchan, Gail A. Bruder, Lynne E. Hewitt, 2012-12-06 This volume describes the theoretical and empirical results of a seven year collaborative effort of cognitive scientists to develop a computational model for narrative understanding Disciplines represented include artificial intelligence cognitive psychology communicative disorders education English geography linguistics and philosophy The book argues for an organized representational system a Deictic Center DC which is constructed by readers from language in a text combined with their world knowledge As readers approach a new text they need to gather and maintain information about who the participants are and where and when the events take place This information plays a central role in understanding the narrative The editors claim that readers maintain this information without explicit textual reminders by including it in their mental model of the story world Because of the centrality of the temporal spatial and character information in narratives they developed their notion of a DC as a crucial part of the reader's mental model of the narrative The events that carry the temporal and spatial core of the narrative are linguistically and conceptually constrained according to certain principles that can be

relatively well defined A narrative obviously unfolds one word or one sentence at a time This volume suggests that cognitively a narrative usually unfolds one place and time at a time This spatio temporal location functions as part of the DC of the narrative It is the here and now of the reader s mind s eye in the world of the story Organized into seven parts this book describes the goal of the cognitive science project resulting in this volume the methodological approaches taken and the history of the collaborative effort It provides a historical and theoretical background underlying the DC theory including discussions of deixis in language and the nature of fiction It goes on to outline the computational framework and how it is used to represent deixis in narrative and details the linguistic devices implicated in the DC theory Other subjects covered include crosslinguistic indicators of subjectivity psychological investigations of the use of deixis by children and adults as they process narratives conversation direction giving implications for emerging literacy and a narrator s experience in writing a short story

Was the American Revolution a Mistake? Burton Weltman, 2013-08-27 Why was George Washington dismayed by the outcome of the American Revolution Would slavery still exist if the South had not seceded from the Union in 1861 Might socialists rule America today if Teddy Roosevelt had not run for President and lost in 1912 History is full of contingencies People confront problems and debate options for solving them Then they make a choice and face the consequences of their choice Often they wonder if a different choice might have been better Was the American Revolution a mistake Was racial segregation inevitable Was the Cold War necessary Americans have repeatedly asked these sorts of questions as they examined the consequences of their choices This is a book about revisiting crucial choices people made in history and examining the consequences of those choices for them and for us It demonstrates a method of teaching history that recreates

events as people experienced them and asks important questions that troubled them but that rarely appear in conventional textbooks Unlike conventional methods that often reduce history to names dates and factoids for students to memorize it is a method that brings past debates to life the losers as well as the winners points of view and makes the subject exciting In studying history as choice students examine the problems people faced their options for solving them their decision making processes and the choices they made Then students evaluate the consequences of those choices both for people in the past and us today They explore what might have happened if different choices had been made Finally students relate the consequences of those past choices to problems we face today and the choices we need to make History as choice is a practical and practicable method It has been designed to satisfy the curriculum goals of the National Council for the Social Studies and the book explains how it can be used to satisfy any state or local curriculum standards The book also identifies and illustrates resources that can be used with this method from data bases to popular music and explains how teachers can gradually integrate it into their courses In the first part of the book the method of history as choice is explained using the question of whether the American Revolution was a mistake as a case in point The second part of the book explores thirteen other questions about significant issues and events in American history as additional examples of how one might teach history as choice

Olson,Min Wang,2013-12-16 An important contribution to the multi disciplinary study of literacy narrative and culture this work argues that literacy is perhaps best described as an ensemble of socially and historically embedded activities of cultural practices It suggests viewing written language producing and distributing deciphering and interpreting signs are closely related to other cultural practices such as narrative and painting The papers of the first and second parts illustrate this view in contexts that range from the pre historical beginnings of tracking signs in hunter gatherer cultures and the emergence of modern literate traditions in Europe in the 17th to 19th century to the future of electronically mediated writing in times of the post Gutenberg galaxy The chapters of the third present results of recent research in developmental and educational psychology Contributions by leading experts in the field make the point that there is no theory and history of writing that does not presuppose a theory of culture and social development At the same time it demonstrates that every theory and history of culture must unavoidably entail a theory and history of writing and written culture This book brings together perspectives on literacy from psychology linguistics history and sociology of literature philosophy anthropology and history of art It addresses these issues in plain language not coded in specialized jargon and addresses a multi disciplinary forum of
