**Encyclopedia of African Airlines** Ben R. Guttery, 1998-01-01 The rainy season terrain and financial hardships have made the construction of highways and railroads nearly impossible in many parts of Africa This lack of modern infrastructure has been overcome in some part by the development of air transportation Hundreds of carriers both small and large government owned and private have connected all parts of the continent Together they have had a tremendous impact on the African economy and the people Country by country this comprehensive reference work provides brief histories of over 700 airlines in 54 African nations Each entry has the years of operation of the carrier along with information on its origin growth and route structure Aircraft usage including registration numbers and nicknames is covered in many cases Any crashes involving aircraft in the carrier's fleet are also noted An appendix gives the location of all major African airports
