Zimsec Green Science:

Towards Inclusive Education in Zimbabwe Tsediso Michael Makoelle, Tsitsi Chataika, 2025-02-24 This book aims to provide a comprehensive review of the state of inclusive education in Zimbabwe since the adoption of the philosophy in 1994. While literature exists that accounts for the situation regarding special and inclusive education in Zimbabwe, there is a need for a more thorough and complete understanding of the state of inclusive education in the country. This book explores and reflects on the perspectives of various stakeholders within the Zimbabwean education system. It offers a conceptual understanding of the implementation of inclusive education in a postcolonial and politically troubled Zimbabwe and provides recommendations for policy development and formulation as well as the development and strengthening of inclusive teaching and learning practices. The insights offered in this book could have a significant impact on clarifying the roles of stakeholders and ensuring that education provision leads to student support that addresses the needs of all students in Zimbabwe.

Fostering Long-Term Sustainable Development in Africa David Mhlanga, Mufaro Dzingirai, 2024-08-31 This book provides a broad and insightful guide to the economic, social, and environmental concerns seen within Africa. It highlights the central economic challenges faced by African countries and outlines ways in which long-term sustainable development in Africa can be achieved. A particular focus is given to issues of poverty, inequality, and unemployment, and how poor infrastructure, limited healthcare, and education, and environmental deterioration are exacerbating these issues. By looking at the limited effectiveness of traditional development initiatives, a new framework for economic development is presented that focuses on community ownership and long-term sustainability and which acknowledges the history of colonisation, economic exploitation, and political instability that has held Africa back in the past. This book takes hope from countries within the Global South that have moved towards sustainable development and sets out ways in which other countries can follow them. It will be relevant to students, researchers, and policymakers interested in development and environmental economics. *The Routledge Handbook of Disability in Southern Africa* Tsitsi Chataika, 2018-07-27 This comprehensive ground-breaking southern African-centred collection spans the breadth of disability research and practice. Reputable and emerging scholars together with disability advocates adopt a critical and interdisciplinary stance to probe, challenge, and shift commonly held social understandings of disability in traditional discourses, frontiers, and practices in prominent areas such as international development, disability studies, education, culture, health, religion, gender, sports, tourism, ICT, theatre, media, housing, and legislation. This handbook provides a body of interdisciplinary analyses suitable for the development of disability studies in southern Africa. Through drawing upon and introducing resources from several disciplines, theoretical perspectives, and personal narratives from disability activists, it reflects on disability and sustainable development in southern Africa. It also addresses a clear need to bring together interdisciplinary perspectives and narratives on disability and sustainable development in ways that do not undermine disability politics advanced by disabled people across the world. The handbook

further acknowledges and builds upon the huge body of literature that understands the social cultural educational psychological economic historical and political facets of the exclusion of disabled people The handbook covers the following broad themes Disability inclusion ICT and sustainable development Access to education from early childhood development up to higher education Disability employment entrepreneurship and community based rehabilitation Religion gender and parenthood Tourism sports and accessibility Compelling narratives from disability activists on societal attitudes toward disability media advocacy accessible housing and social exclusion Thus this much awaited handbook provides students academics practitioners development partners policy makers and activists with an authoritative framework for critical thinking and debates that inform policy and practice in incomparable ways with the view to promoting inclusive and sustainable development
