Information and Communications Technology in STEM Education Umesh Ramnarain, Mdutshekela

Ndlovu, 2023-07-21 This timely book presents the latest scholarly research on the integration of Information Communications Technology ICT for enhanced STEM education in African schools and universities. Featuring critical discussion and illustration of key data-led arguments, this volume gives a comprehensive picture of the breadth, complexity, and diversity of issues present in different African countries. It highlights a diverse range of topics such as approaches to ICT integration, the use of digital technologies to support inquiry-based learning, teacher development, and contextual issues in ICT integration for STEM education. Chapters feature contributions and shared experiences from prominent science educators and researchers from across African regions and demonstrate findings and reflections on emerging trends, pedagogical innovations, and research-informed practices on ICT integration in STEM education. Offering cutting-edge research on STEM and digital education in Africa, the book will appeal to researchers, postgraduate students, and scholars in the fields of STEM education, ICT education, digital education, and pedagogy. Digital Financial Inclusion and Regulation Ogochukwu Monye, 2022-10-17

This book explores the various considerations for achieving an effective regulatory strategy to improve financial access and usage in Nigeria and beyond. Gaps in the legal and institutional framework for digital financial services (DFS) as well as the barriers that contribute to financial exclusion are identified, as are the policy changes needed to provide more extensive, accessible, and sustainable financial inclusion value. In addition, the book covers divergent themes around the use of and insights for regulating industry financial services providers and challenger entities that herald industry disruption. The book adopts three research methods: The doctrinal research method is used to buttress the law and development analysis, and the themes around regulation, adoption, and usage of financial services. To elucidate the application of financial innovations, comparative case studies are drawn from selected jurisdictions including Kenya, South Africa, Ghana, The Philippines, Brazil, Mexico, Uganda, Pakistan, India, and Bangladesh. Lastly, using the empirical research method, the author reports the burden experienced by the residents of a community without banks in accessing finance. Included in this discussion are the barriers to finance as well as the coping strategies adopted by the community residents to access formal and informal finance.

Towards sustainable wildlife management Grimaud, P., Gumbo, D., Le Bel, S. (eds.), 2022-06-06 Zambia and Zimbabwe with Angola, Botswana, and Namibia constitute the Kavango Zambezi Transfrontier Conservation Area (KaZa TFCA), which is the largest transfrontier conservation area in the world (520 000 km²) and whose key objective is to join fragmented wildlife habitats to form an interconnected mosaic of protected areas and transboundary wildlife corridors. In this region, wildlife populations have declined over the past three decades, mainly due to poaching and loss of habitat. In this TFCA, the Sustainable Wildlife Management (SWM) Programme aims to address these challenges by promoting the model of community conservancy (CC) to diversify income-generating activities and supply a well-balanced source of wild and domestic protein. In

Zimbabwe the SWM project in KaZa supports the emerging project of Mucheni CC encompassing three wards of Binga District in Matabeleland North Province In Zambia the target implementation sites are the Simalaha and Inyasemu CC located in Southern Zambia The SWM Programme is an initiative of the Organization of the African Caribbean and Pacific States OACPS funded by the European Union and co financed by the French Facility for Global Environment FFEM and the French Development Agency AFD This seven year programme 2017-2024 is being implemented in 15 OACPS member countries by a consortium of partners including the Food and Agriculture Organization of the United Nations FAO the Centre for International Cooperation in Agricultural Research for Development CIRAD the Centre for International Forestry Research CIFOR and the Wildlife Conservation Society WCS

Adaptive Collaborative Management in Forest Landscapes Carol J. Pierce Colfer, Ravi Prabhu, Anne M. Larson, 2021-12-12 This book examines the value of Adaptive Collaborative Management for facilitating learning and collaboration with local communities and beyond utilising detailed studies of forest landscapes and communities Many forest management proposals are based on top down strategies such as the Million Tree Initiatives Forest Landscape Restoration FLR and REDD often neglecting local communities In the context of the climate crisis it is imperative that local peoples and communities are an integral part of all decisions relating to resource management Rather than being seen as beneficiaries or people to be safeguarded they should be seen as full partners and Adaptive Collaborative Management is an approach which prioritises the rights and roles of communities alongside the need to address the environmental crisis The volume presents detailed case studies and real life examples from across the globe promoting and prioritizing the voices of women and scholars and practitioners from the Global South who are often under represented Providing concrete examples of ways that a bottom up approach can function to enhance development sustainably via its practitioners and far beyond the locale in which they initially worked this volume demonstrates the lasting utility of approaches like Adaptive Collaborative Management that emphasize local control inclusiveness and local creativity in management This book will be of great interest to students scholars and practitioners working in the fields of conservation

forest management community development and natural resource management and development studies more broadly The Open Access version of this book available at www.taylorfrancis.com has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license

Google Earth Engine Applications Lalit Kumar, Onesimo Mutanga, 2019-04-23 In a rapidly changing world there is an ever increasing need to monitor the Earth's resources and manage it sustainably for future generations Earth observation from satellites is critical to provide information required for informed and timely decision making in this regard Satellite based earth observation has advanced rapidly over the last 50 years and there is a plethora of satellite sensors imaging the Earth at finer spatial and spectral resolutions as well as high temporal resolutions The amount of data available for any single location on the Earth is now at the petabyte scale An ever increasing capacity and computing power is needed to handle such large datasets The Google Earth Engine GEE is a cloud based computing platform that was established by Google to support such data processing This facility allows for the storage processing and analysis of spatial data using centralized high power computing resources allowing scientists researchers hobbyists and anyone else interested in such fields to mine this data and understand the changes occurring on the Earth's surface This book presents research that applies the Google Earth Engine in mining storing retrieving and processing spatial data for a variety of applications that include vegetation monitoring cropland mapping ecosystem assessment and gross primary productivity among others Datasets used range from coarse spatial resolution data such as MODIS to medium resolution datasets Worldview 2 and the studies cover the entire globe at varying spatial and temporal scales **2013**
