**Scientific Publishing Ecosystem** Payal B. Joshi, Prathamesh P. Churi, Manoj Pandey, 2024-08-01 The book aims to converge the perspectives of authors editors and reviewers to discuss modern scientific publishing practice and emerging concerns in the contemporary world Authors editors and reviewers form a triage in a publishing ecosystem which is witnessing a huge pressure due to changing evaluation criteria for career progression and grant funding The major perspective of this book is to put forth the present day emerging ills of modern publishing system and sensitize the research fraternity be it young researchers or established scientists towards practicing good science and preserving spirit of scientific discoveries The edited book consists of three parts viz Part I Authors Authorship and Scholarly Dissemination features ten chapters devoted to describe authorship issues and good publication practice plagiarism concerns preprints open access models conflicting interests rise of review papers writing book reviews and assessing faculty beyond metrics Part II Editors Editorial Desks and Issues of Scientific Misconduct features eight chapters devoted to discuss on issues of editorial misconduct desk rejections paper mills letters to editors image duplication emerging ChatGPT in writing reviewing spaces citation cartels and retractions Finally Part III Reviewers and Developing Evaluator's Eye features five chapters devoted to discuss peer review as an idea creating model paying peer reviewers training reviewers peer review manipulations and peer review in age of AI All chapters in the book are written by expert contributors of the field that provides a systematic approach of understanding various challenges opportunities and ethical considerations of scientific publishing ecosystem Most of the chapters have featured recent cases of scientific misconduct as examples to reflect scale of the problem This book will serve as a reference to research practitioners in understanding assigning authorship on papers modern day publishing collaboration role of editors to serve journals in a holistic manner and ensuring fair peer review mechanisms

An ex-post impact assessment of IFPRI's GRP22 program, Water Research Allocation Bennett, Jeffrey W., 2013-04-10 The performance of the International Food Policy Research Institute's IFPRI's research program that focuses on water resource issues is reviewed for the period 1994 2010 around the three themes that constitute the program global modeling river basin modeling and institutions The IFPRI water team has been involved in leading edge research in a number of dimensions it has focused on analysis at varying geographic scales the work has been truly interdisciplinary by engaging economics with biophysical science and other social sciences and research outputs have been innovative in advancing institutional analysis and water pricing and in policy measures addressing the complexities of water supply management In the research tasks IFPRI's water team actively collaborated with a wide range of researchers from within the CGIAR network national research institutes and universities Within the team a largely stable

group of leaders has been responsible for the professional development of a substantial cohort of junior staff who have moved onto successful careers elsewhere The output of the program has been prolific and prominent in academic policy and development communities The approach taken is to review selected publications from the themes assess the quality of the journals in which papers have been published and evaluate the performance on average of researchers in the program In addition surveys of stakeholders were carried out and three specific projects were subjected to detailed review The assessment demonstrated the high regard in which the program research outputs and researchers are held The IFPRI water team has been remarkably productive throughout the 16 years considered working on issues that are of high relevance to policy and producing work that has largely been cutting edge However impacts generated by individual projects were not consistently or readily identifiable To maximize the benefits of this performance and to overcome challenges associated with securing more outcomes this report recommends that a more coordinated approach be taken to develop the research project portfolio This would involve better targeting of projects to policy objectives through a more systematic review of research demand forces and improved integration of research work with policy development processes The latter in particular requires the development of a sense of research project ownership within the policy circles the research is designed to influence More effort in the development of in country research partnerships can aid this process as local researchers can act as champions within local policy circles Where government agencies have a research function their integration into the partnerships is recommended Avoidance of completing research projects in a policy vacuum is critical but requires both advanced planning of each research project as well as constant adaptation of the work plan to often rapidly evolving policy contexts To achieve project impacts beyond the immediacy of the specific case study context a more targeted and coordinated publication strategy should be developed in light of changing publication technology Project webpages within the IFPRI website with readily downloadable reports are useful during the implementation of each project and more formal papers should be targeted for publication in high impact factor technical journals with parallel papers prepared for more policy oriented journals that have high circulations

**Doing Research That Matters** Marco Busi, 2013-06-26 Doing Research That Matters looks at an old issue from a new perspective taking a fresh and cross disciplinary approach to learning how we can contribute with our work to shaping the future of management *Proceedings of the XV International symposium Symorg 2016* Ondrej Jaško, Sanja Marinković, 2016-06-03 Eugene Garfield 1925-2017 Antonella De Robbio, Raman Nair R, 2017-04-01 Garfield's greatest contribution to science was the Science Citation Index SCI It is a system that used to chart connections between pieces of scientific literature It is not only an intellectual achievement but also an information engineering marvel covering millions of records from numerous subject fields and communicated over worldwide networks These databases became the foundation of the online research tool called the Web of Knowledge And it has now become accessible electronically via the Web of Science Garfield enabled information retrieval to scale up basically creating

the entire information science field as we know it today His life and work will surely inspire generations of scientists in advancing the frontiers of human knowledge This is Informatics Studies 4 2 which is Eugene Garfield Memorial Issue It gives a bird s eye view of Garfield s life and work and consist of an 80 page interview of Garfield published in print for the first time presenting his views on impact of information systems in scientific research NGOs the future of Open Access current research and Big science which can guide academic administrators science policy makers in governments and scientists

**Rankings and the Reshaping of Higher Education** Ellen Hazelkorn,2015-03-23 University rankings have gained popularity around the world and are now a significant factor shaping reputation This second edition updates Ellen Hazelkorn s first comprehensive study of rankings from a global perspective drawing in new original research and extensive analysis It is essential reading for policymakers managers and scholars *Searcher* ,2009

**Demystifying Scholarly Metrics** Marc W. Vinyard,Jaimie Beth Colvin,2022-02-25 Demystifying Scholarly Metrics gives librarians and faculty the confidence to navigate the maze of scholarly metrics identify quality journals in which to publish and measure the impact of scholarly works Both librarians and professors can be overwhelmed by the bewildering number of scholarly metrics This user friendly book demystifies them helping librarians become familiar with scholarly metrics and giving them the confidence to assist faculty at their institutions It also equips faculty authors with the knowledge to evaluate journals and use metrics to track their scholarly impact Several controversies exist in the scholarly metrics landscape including a disagreement between the proponents of altmetrics and traditional bibliometrics Even more contentious debates are breaking out over predatory journals and open access publishing Authors Mark Vinyard and Jaimie Beth Colvin who successfully launched a faculty publishing initiative explain which aspects of metrics are truly essential to grasp and they place these numbers in context They help readers identify the metrics that are the best fit for their scholarship and give librarians and professors the tools to make smart decisions in this changing scholarly metrics landscape

**Gaming the Metrics** Mario Biagioli,Alexandra Lippman,2020-01-28 How the increasing reliance on metrics to evaluate scholarly publications has produced new forms of academic fraud and misconduct The traditional academic imperative to publish or perish is increasingly coupled with the newer necessity of impact or perish the requirement that a publication have impact as measured by a variety of metrics including citations views and downloads Gaming the Metrics examines how the increasing reliance on metrics to evaluate scholarly publications has produced radically new forms of academic fraud and misconduct The contributors show that the metrics based audit culture has changed the ecology of research fostering the gaming and manipulation of quantitative indicators which lead to the invention of such novel forms of misconduct as citation rings and variously rigged peer reviews The chapters written by both scholars and those in the trenches of academic publication provide a map of academic fraud and misconduct today They consider such topics as the shortcomings of metrics the gaming of impact factors the emergence of so called predatory journals the salami slicing of scientific findings the rigging of global university rankings and the

creation of new watchdogs and forensic practices      International Conference on Digital Libraries (ICDL) 2016 Shantanu Ganguly, P K Bhattacharya, Projes Roy, Pallavi Shukla, N Deepa, 2016-12-14 The ICDL Conferences are recognized as one of the most important platforms in the world where noted experts share their experiences Many DL experts have contributed thought provoking papers in ICDL 2016 These important papers are reviewed and conceptualized into ICDL on different areas of DL proceedings The Proceedings have two volumes and over 700 pages      Creating Environmental and Occupational Health Derek R. Smith, 2011-06-27 Occupational hazards have plagued human civilisation since time immemorial and much of the progress in making workplaces safer is reflected by and recorded in the academic periodicals of environmental and occupational health As a result careful examination of these journals provides an interesting record of the field itself as well as documenting the concerns and issues deemed important by editorial boards and contributors over time Derek Smith has established himself as a pioneer in analyzing the literature of environmental and occupational health Thanks to his fine work we may use this resource to understand both the history of EOH for its own sake and the dynamics of publishing in one medium sized but largely self contained scientific field Tee L Guidotti      *Encyclopedia of Library and Information Sciences* John D. McDonald, Michael Levine-Clark, 2017-03-15 The Encyclopedia of Library and Information Sciences comprising of seven volumes now in its fourth edition compiles the contributions of major researchers and practitioners and explores the cultural institutions of more than 30 countries This major reference presents over 550 entries extensively reviewed for accuracy in seven print volumes or online The new fourth edition which includes 55 new entries and 60 revised entries continues to reflect the growing convergence among the disciplines that influence information and the cultural record with coverage of the latest topics as well as classic articles of historical and theoretical importance      **The Cosmopolitanization of Science** J. Zhang, 2012-04-11 Focussing on China's stem cell research this book investigates how over the last decade Chinese scientists ethicists and policy makers have developed a cosmopolitan sensibility in comprehending and responding to ethical and regulatory concerns      **Organizing in a Digitized World** Stefano Za, Augusta Consorti, Francesco Virili, 2021-12-08 In a digitized world organizations and individuals have to deal with several challenges Both public and private organizations must revise their processes and create new ones to take advantage of new opportunities and respond to emerging threats At the same time people need to redesign their personal and professional lives to create situations or conditions conducive to achieving their goals in an ever expanding digital environment This book contains a collection of research contributions that address the issues that individuals organizations and society face when operating in a digitized world The plurality of views offered makes this book particularly relevant to academics businesses and public sector organizations It gathers a selection of the best papers double blind peer reviewed presented at the Annual Conference of the Italian Section of AIS in October 2020 in Pescara Italy      *R.J. Rummel: An Assessment of His Many Contributions* Nils Petter Gleditsch, 2017-05-30 This book is open access under a CC BY license The book provides a critical

and constructive assessment of the many contributions to social science and politics made by Professor R J Rummel Rummel was a prolific writer and an important teacher and mentor to a number of people who in turn have made their mark on the profession His work has always been controversial But after the end of the Cold War his views on genocide and the democratic peace in particular have gained wide recognition in the profession He was also a pioneer in the use of statistical methods in international relations His work is not easily classified in the traditional categories of international relations research realism idealism and constructivism He was by no means a pacifist and his views on the US Soviet arms race led him to be classified as a hawk But his work on the democratic peace has become extremely influential among liberal IR scholars and peace researchers Above all he was a libertarian People of the State of Illinois V.
