

Overview of the AVIATOR 700 system

The AVIATOR 700 system offers the classical aeronautical communications services and the SwiftBroadband service. The TT-5035A Satellite Data Unit (SDU) provides multi-channel voice and fax and data (Swift 64), while the SwiftBroadband Unit (SBU) provides access to SwiftBroadband, the aeronautical BGAN service. The SDU is the controlling unit of the system and the SBU works as a slave unit to the SDU. The data services available depend on the satellite coverage, read more about satellite coverage at [Services](#) on page 2-4.

The AVIATOR 700 system provides a wide range of user interfaces: several 4-wire and 2-wire interfaces, ISDN, WLAN and Ethernet interfaces available on the SDU and SBU.

The following drawing shows the AVIATOR 700 cabin installation with connected communication devices and available options:
