Thriving Systems Theory And Metaphor Driven Modeling:

Thriving Systems Theory and Metaphor-Driven Modeling Leslie J. Waguespack, 2010-10-01 How is it that one system is more effective appealing satisfying and or more beautiful than another to its stakeholder community This question drove Christopher Alexander's fifty year quest to explain great physical architecture and gave birth to pattern languages for building that underpin much of modern systems engineering How is it that so many individual stakeholders consistently recognize the same quality the same beauty in a system This question led George Lakoff to research the role of conceptual metaphor in human understanding What is essential to stakeholders satisfaction with systems Fred Brooks in his publications addressed this question This monograph fuses these diverse streams of thought in proposing Thriving Systems Theory by translating Alexander's properties of physical design quality into the abstract domain of information systems and modeling Metaphor Driven Modeling incorporates the theory while examining its impact throughout the system life cycle modeling design and deployment The result is holistic and innovative a perspective on system quality invaluable to students practitioners and researchers of software and systems engineering

Designing Thriving Systems Leslie J. Waguespack, 2019-04-10 This monograph illuminates a design mindset for systems artefacts that not only survive but thrive Of itself an artefact is devoid of design quality until encountered in a specific social context by human attendants Design quality is the affect of an intertwining of a an artefact's structural and behavior properties b an attendant humanly conception of quality an appreciative system and c the enfolding social context of their encounter To pursue quality in design is to interweave these three strands bound as a durable cord that evokes a visceral satisfaction or the delight of a ringing musical chord The human consciousness of design quality is fundamentally metaphoric and dynamic a perception of reality mediated by a personal value disposition In the continuum of experience living moment after moment both the attendant's metaphorical appreciation and their sense of quality evolve And thus design quality issues from perpetual concentric cycles of design construct experience learn assess calibrate over the life span of relationship with an artefact Design as a verb's purpose is to service the life in that relationship sustain its survival and hopefully raise that life to a state of thriving Design quality manifests throughout the cycles of design as a verb rather than as a product of it Such is the mindset in which the designer must indwell and that design education must nurture While all artefacts are systems the domain of artefact design of which I am most experienced is computing systems Therefore I will rest upon that domain to explore a theory and practice of design as a verb designing thriving systems

Mastering the Art of Command Trent Hone, 2022-09-15 Honorable Mention for the John Lyman Book Award in the category of U S Naval History Mastering the Art of Command is a detailed examination of Admiral Chester W Nimitz's leadership during World War II It describes how he used his talents to guide the Pacific Fleet following the attacks on Pearl Harbor win crucial victories against the forces of Imperial Japan and then seize the initiative in the Pacific Once Nimitz's forces held the initiative they maintained it through an offensive campaign of

unparalleled speed that overcame Japanese defenses and created the conditions for victory As a command and operational history Mastering the Art of Command explores how Nimitz used his leadership skills command talents and strategic acumen to achieve these decisive results Hone recounts how Nimitz as both Commander in Chief of the Pacific Fleet CINCPAC and Commander in Chief of the Pacific Ocean Areas CINCPAC revised and adapted his organizational structure to capitalize on lessons and newly emerging information Hone argues that Nimitz because he served simultaneously as CINCPAC and CINCPAC was able to couple tactical successes to strategic outcomes and more effectively plan and execute operations that brought victory at Midway Guadalcanal the Marshall Islands the Philippines Iwo Jima and Okinawa As a study of leadership Mastering the Art of Command uses modern management theories and builds upon the approach in his award winning Learning War Trent Hone explores the challenge of leadership in complex adaptive systems through Nimitz s behavior and causes us to reassess the inevitability of Allied victory and the reasons for its ultimate accomplishment A new narrative history of the Pacific war this book demonstrates effective patterns for complexity informed leadership by highlighting how Nimitz maintained coherence within his organization established the conditions for his subordinates to succeed and fostered collaborative sensemaking to identify and pursue options more rapidly Nimitz s strategic artistry is a pattern worthy of study and emulation for today s military officers civilian leaders and managers in large organizations **Social Strategies**

Facundo, 2016-10-04 Revises key psychoanalytic concepts that influence interpretive practices in the humanities and formulates a new approach to reading fiction Oscillations of Literary Theory offers a new psychoanalytic approach to reading literature queerly one that implicates queer theory without depending on explicit representations of sex or queer identities By focusing on desire and identifications A C Facundo argues that readers can enjoy the text through a variety of rhythms between two eroticized positions the paranoid imperative and queer reparative Facundo examines the metaphor of rupture as central to the logic of critique particularly the project to undo conventional formations of identity and power To show how readers can rebuild their relational worlds after the rupture Facundo looks to the themes of the desire for omniscience the queer pleasure of the text loss and letting go and the vanishing points that structure thinking Analyses of Nabokov's Lolita Danielewski's House of Leaves Findley's The Wars and Ishiguro's Never Let Me Go are included which model this new approach to reading Armed with a full repertoire of psychoanalytic resources Facundo navigates the paranoid reparative debate in literary studies with greater finesse than any critic I've read Reframing current critical impasses Oscillations of Literary Theory makes substantial contributions to narrative theory and aesthetics by illuminating their crucial connections with sexuality and pleasure Facundo offers us here nothing less than a new method of reading queerly Tim Dean University of Illinois Urbana Champaign This book seeks to understand hermeneutic imperatives and flights from these in terms of paranoid and reparative drives as distinct from affect It is a bold and ambitious project but Facundo brings to it an exceptional array of skills I am impressed by the author's close subtle and very canny readings of both theoretical and

literary texts and by her demonstration of the complexity variety and centrality of ideas and operations of paranoia and the reparative in writings from Freud to the present *Oscillations* revitalizes psychoanalytic criticism in its distinctly queer relation to psychoanalysis a relation that yields surprising and refreshing insights Stephen M Barber coeditor of *Regarding Sedgwick Essays on Queer Culture and Critical Theory*

Partnerships for Regional Innovation and Development Marta Gancarczyk, Anna Ujwary-Gil, Manuel González-López, 2021-08-05 This monograph presents the experience in the implementation of smart specialization strategies S3 from multilevel policy governance as well as from the bottom up perspectives of firms clusters and networks in selected European countries The presented research focuses on relevance and feasibility of the S3 adoption emphasizing the importance of linking policy considerations with partnerships at lower governance levels The major contribution of the presented research rests in theoretical implications and practical recommendations relevant for the implementation of regional S3 in the European context with the possibility of place based adoption in other environments The book is also valuable for synthesizing the most recent advancements in smart specialization as a policy concept and the concept of transformation and growth for territorial units and economic entities This book aims to further diffuse and expand the academic community's learning of the new S3 approach in Europe and beyond The book will be of interest and useful to the academic community of researchers and doctoral students focused on regional innovation development and related policy as well as on entrepreneurship networks and clusters Public sector professionals dealing with regional development regional innovation policies and industrial transformation will also benefit from its content

Participatory Practice Ledwith,

Margaret, Springett, Jane, 2010 In this second edition of a bestselling book the authors unique holistic and radical perspective on participatory practice has been updated to reflect advances made in the past decade the impact of neoliberalism and austerity and the challenges of climate change and the pandemic Bridging the divide between community development ideas and practice over half of this innovative book comprises new content with updated features including reflective questions key points highlighted throughout each chapter a glossary of terms The authors argue that transformative practice begins with everyday stories about people s lives and that practical theory generated from these narratives is the best way to inform both policy and practice This long awaited new edition will be of interest to academics and community based practitioners working in a range of settings including health and education

The Anthropocene Seth T. Reno, 2021-11-22 Perhaps no concept has become dominant in so many fields as rapidly as the Anthropocene Meaning The Age of Humans the Anthropocene is the proposed name for our current geological epoch beginning when human activities started to have a noticeable impact on Earth s geology and ecosystems Long embraced by the natural sciences the Anthropocene has now become commonplace in the humanities and social sciences where it has taken firm enough hold to engender a thoroughgoing assessment and critique Why and how has the geological concept of the Anthropocene become important to the humanities What new approaches and insights do the humanities offer What narratives and critiques of the Anthropocene do the humanities produce What does it mean to study literature of the Anthropocene These are the central questions that this collection explores Each chapter takes a decidedly different humanist approach to the Anthropocene from environmental humanities to queer theory to race illuminating the important contributions of the humanities to the myriad discourses on the Anthropocene This volume is designed to provide concise overviews of particular approaches and texts as well as compelling and original interventions in the study of the Anthropocene Written in an accessible style free from disciplinary specific jargon many chapters focus on well known authors and texts making this collection especially useful to teachers developing a course on the Anthropocene and students undertaking introductory research This collection provides truly innovative arguments regarding how and why the Anthropocene concept is important to literature and the humanities

American Book Publishing Record ,1999 **Living by Models** Hongbing Yu, 2021-08-12 This book provides an intensive interdisciplinary study of Modeling Systems Theory MST a significant post modern theoretical framework that transcends the long cold war between the Saussurean and the Peircean

traditions of the studies of the sign In most academic attempts to adopt a semiotic approach to complex diverse human cultural phenomena academics generally tend to choose discretely from the Peircean and the Saussurean traditions and conduct dispersive analyses from isolated perspectives via such basic concepts as sign text code and metaphor This practice not only leads to the frequent occurrence of repetitions contradictions and partiality but also excludes the semiotic Subject However as this book attempts to argue the late world renowned American scholar Thomas A Sebeok 1920 2001 with his unique thought on semiotic modeling created an integrated research framework and provided semiotics with a unified theoretical system that transcends both traditions and particularly accentuates the dynamic pluralism of the Subject One of the most important contemporary semioticians linguists and masters of cultural studies Sebeok made enormous contributions to the progress of world semiotics through his distinguished theoretical achievements and practical activities which have extended a determinative influence on laying the groundwork and pointing out the directions for the development of semiotics especially biosemiotics in the second half of the 20th century The scope of Sebeok s trans disciplinary semiotic thought is extraordinarily large in the center of which lies Modeling Systems Theory As this book will show MST has perfectly demonstrated a dialectic globality and an open dialogism and has already become a significant subject matter of contemporary international semiotic studies Sebeok s reformation of the critical Lotmanian concept of modeling has indeed made a significant contribution to our common cause of semiotic inquiries especially cognitive semiotics However contemporary studies on Sebeok s thought on modeling are largely confined to introductions and applications Seldom has the possibility arisen that they can also be tested expanded and refined through interactions and collaborations with other research findings in order to remain a living system and become a more functional one This conviction has directly inspired the author to incorporate into semiotics the latest confirmed discoveries in neurocognitive sciences particularly cultural neuroscience and thus formulate that the process of semiosis has an effective deep shaping power over the individual human modeler Put another way aside from the long established Peircean belief that signs philosophically and epistemologically make us what we are it should be noted that the behavior of modeling actually influences and even alters the organic make up and biological structure of the human body in particular the human brain In a nutshell we literally live by models This book argues that the birth of MST actually underwent two critical transformational phases from Sebeok s early responses to the Tartu Moscow School in the 1970s all the way up to the eventual proposal of the concept of models as the forms of meaning in the year of 2000 In addition through a diachronic contrast between the two developmental phases of the Sebeokian view of modeling and in depth analyses of the taxonomy and the dimensionality of modeling this book shows that MST has achieved the first genuine systematic merging and creative transcendence of the Saussurean and the Peircean traditions in the history of semiotic inquiries successfully actualizing an internal external semiotic integration MST views meaning as an internal model and the generation of the former as the working of the latter Based on this ground and some

latest relevant findings of neurocognitive sciences and social psychology this book holds that the generation of meaning is a dynamic Subjective process of semiosis This conclusion consists of two closely interrelated facets the semi autonomy of meaning generation and the deep dynamic co shaping effect between the Subject and its models in meaning generation Extending this conclusion this book proceeds to argue that there is a relationship of co shaping coevolution between culture and humans Meanwhile this book comments on and analyses the methodological features of MST and Sebeok s contradictions and also provides a corresponding solution as well as directions for future research The whole book also features critical analyses of quintessential Eastern and Western sociocultural practices and fictional narratives through the conceptual framework of Modeling Systems Theory based on the author s own recent researches on MST as a critical application that sheds new light on modeling communication and cognition which highlights the significance of subjectivity the plurality of meaning generation the dynamic nature of Umwelten and shared emotions in human modeling activities Two representatives have been chosen as cases in point to study fictional narratives viz fiction and movies The above mentioned interdisciplinary critiques synthesis and applications in this book bring to light a hidden fundamental mechanism that underlies the diversified manifestations of sign activities in and across different human societies and cultures It is also believed to be able to facilitate the understanding of human cognition and communication from a dynamic semiotic perspective The book can be used as a reference book for readers who are interested in the fields of semiotics linguistics literary theory cognitive sciences communication cultural studies and so on

System Design Modeling and Metamodeling John P. van Gigch, 1991-07-31 This book is a venture in the worlds of modeling and of metamodeling At this point I will not reveal to readers what constitutes metamodeling Suffice it to say that the pitfalls and shortcomings of modeling can be cured only if we resort to a higher level of inquiry called metainquiry and metadesign We reach this level by the process of abstraction The book contains five chapters from my previous work *Applied General Systems Theory* Harper and Row London and New York First Edition 1974 Second Edition 1978 More than ten years after its publication this material still appears relevant to the main thrust of system design This book is dedicated to all those who are involved in changing the world for the better In a way we all are involved in system design from the city manager who struggles with the problems of mass transportation or the consolidation of a city and its suburbs to the social worker who tries to provide benefits to the urban poor It includes the engineer who designs the shuttle rockets It involves the politician engaged in drafting a bill to recycle containers or one to prevent pesticide contamination of our food The politician might even need system design to chart his or her own re election campaign

Metaphors of Interrelatedness Linda E. Olds, 1992-01-01 Olds examines the role of metaphor and models in psychology science and religion and argues the case for systems theory as a contemporary unifying metaphor across domains with particular emphasis on clarifying its potential for psychology
