Externalities of transportation fuels Dileep K. Birur, Robert H. Beach, Ross J.

Loomis,Sealy Chipley,Michael P. Gallaher,David C. Dayton,2013-07-31 This research report examines the economic and environmental externalities associated with the US transportation sector The United States currently accounts for about 25 percent of world oil consumption about 50 percent of which is imported Achieving energy security by reducing dependence on imported oil has been the foremost challenge of several major energy importing countries including the United States In this study we explored the costs associated with energy security cost of dependence on oil and estimated the environmental externalities associated with different types of transportation fuels based on a set of economic environmental and life cycle analysis models Our assessment of estimations on oil dependence costs indicates that several elements constitute the true cost of oil and not many studies have attempted to include all of these costs for various reasons For analyzing the environmental externalities we used a life cycle analysis model the FASOM GHG model of agriculture and forestry APEEP an integrated assessment model to calculate the marginal damage of emissions GTAP BIO a computable general equilibrium model to estimate land use changes and the OSIRIS model to estimate the species extinctions based on deforestation This study on assessing the externalities could provide a quantitative basis for policy initiatives pertaining to America s future transportation infrastructure This study suggests that there is a need to consider economic environmental and other societal costs within a holistic framework to assess relative costs and benefits and suitability of alternative transportation fuels that could play a role in meeting our future energy needs Social Costs Today Paolo Ramazzotti,Pietro Frigato,Wolfram Elsner,2012 This book deals with the current crises from a somewhat different the usual perspectives It claims that causes and policy implications of these crises cannot be properly assessed by focusing on allocative efficiency or income growth alone it requires a more general approach based on social costs It does not deal with social costs according to the Pigouvian or the Coasian traditions It draws on the work of Original Institutional Economics OIE such as Thorstein Veblen Karl William Kapp and Karl Polanyi on Post Keynesians such as Hyman Minsky and in general on authors who have provided insights beyond the conventional wisdom of economic thought Resource Economics Jon M. Conrad,2010-06-14 A text for students with a background in calculus and intermediate microeconomics and a familiarity with the spreadsheet software Excel
