Written by experts in the fields of insect pest genetics the genetics of biological control organisms and the application of biological control this book provides the first up to date summary of the genetic literature on the genetics of arthropod biological control agents It identifies successful programs and also gaps and needs in research research constraints and

possible research approaches in this important field of pest control The power and applicability of new genetic and molecular biology methods have created new and exciting possibilities to greatly improve the effectiveness of traditional biological control programs This book provides essential information about the state of the art application of these new methods It explains how biological control procedures can be improved covers methods for selecting pesticide resistant strains of natural enemies and looks at methods for maintaining genetic diversity and quality control during the rearing of biological control agents in the laboratory The book also provides information regarding the application of powerful PCR methods for taxonomic identification of strains and species of biocontrol agents

Multiple Representations in Biological Education David F. Treagust, Chi-Yan Tsui, 2013-02-01 This new publication in the Models and Modeling in Science Education series synthesizes a wealth of international research on using multiple representations in biology education and aims for a coherent framework in using them to improve higher order learning Addressing a major gap in the literature the volume proposes a theoretical model for advancing biology educators notions of how multiple external representations MERs such as analogies metaphors and visualizations can best be harnessed for improving teaching and learning in biology at all pedagogical levels The content tackles the conceptual and linguistic difficulties of learning biology at each level macro micro sub micro and symbolic illustrating how MERs can be used in teaching across these levels and in various combinations as well as in differing contexts and topic areas The strategies outlined will help students reasoning and problem solving skills enhance their ability to construct mental models and internal representations and ultimately will assist in increasing public understanding of biology related issues a key goal in today s world of pressing concerns over societal problems about food environment energy and health The book concludes by highlighting important aspects of research in biological education in the post genomic information age
