Rescaling municipal governance amidst political competition in Gauteng: Sedibeng's proposed re-demarcation Thembanani Mkhize,2021-08-27 In 2011 the Gauteng Provincial Government proposed that Sedibeng a Category C district municipality located in the province should be restructured Although the original proposal had anticipated that this would happen after the 2016 local elections the issue remains unresolved due largely to fierce party political opposition and vociferous protests against it on the ground This Occasional Paper examines the dynamics particularities peculiarities and challenges of re demarcating the Gauteng City Region While informed by technical reasons the arguments for and against the merger have tended to gravitate more towards party political rationales for why the re demarcation should or should not go ahead Although these debates raise important merits and demerits for the proposal they are difficult to disentangle from the interests of those whose fortunes would be changed by restructuring In this environment municipal demarcation risks being held hostage by party politics with stakeholders such as political parties using any means at their disposal to have things go their way including by scapegoating the Municipal Demarcation Board MDB The case of Sedibeng presents important lessons about attempts to make post transition local government and mechanisms for determining its configuration work for Gauteng It also highlights the need for strengthening and revising demarcation related legislation How can we make sure that the MDB functions effectively with respect to its primary goals

State Fragility and Resilience in sub-Saharan Africa John Idriss Lahai, Isaac Koomson, 2020-02-18. This book focuses on the indicators of fragility and the resilience of state-led interventions to address them in sub-Saharan Africa. It analyzes the figure of fragile states as the unit of the analysis and situates the study of fragility, governance, and political adaptation within contemporary global and local political, economic, and socio-cultural contexts. The chapters offer an indispensable, econometrically informed guide to better understanding issues that have an impact on fragility in governance and nation building and affect policy making and program design, targeting institutions in various circumstances. These issues, as they relate to the indicators of fragility, are the contexts and correlates of armed conflicts, on statehood and state fragility, the poverty trap, pandemics, and household food insecurity and child labor. Case studies from across 46 sub-Saharan African SSA countries are assessed to offer clear, broad, and multidisciplinary views of what the future holds for them and the international donor communities at large. Regarding state-led interventions, the authors utilize insightful statistical methods and epistemologies to explain the correlates of behavioral, language, frames, and conflict de-escalation, on battle-related deaths across the conflict zones within the sub-region, the regional and country-level interventions to end child labor, the institutional frameworks and interventions in the advancement of food security and health. This book will be of interest to scholars of economics, development, politics in developing countries, Area and African Studies, peace, conflict, and security studies.

This book will provide a Southern perspective on education and human rights in diversity by unpacking each of the following key areas in the intersection between education, human rights, and diversity from a Southern perspective: comparative international perspectives, citizenship, education, human rights, literacies, human rights education, pedagogy, learner discipline in schools, aggression and bullying in schools, addressing human trafficking by means of human rights education, social justice, and the decolonisation of human rights and human rights education.
