procedures validation in contract manufacturing and current harmonization trends Process Validation in Manufacturing of Biopharmaceuticals, Third Edition Anurag S. Rathore, Gail Sofer, 2012-05-09 Process Validation in Manufacturing of Biopharmaceuticals Third Edition delves into the key aspects and current practices of process validation. It includes discussion on the final version of the FDA 2011 Guidance for Industry on Process Validation Principles and Practices commonly referred to as the Process Validation Guidance or PVG issued in final form on January 24, 2011. The book also provides guidelines and current practices as well as industrial case studies illustrating the different approaches that can be taken for successful validation of biopharmaceutical processes. Case studies include Process validation for membrane chromatography, Leveraging multivariate analysis tools to qualify scale down models, A matrix approach for process validation of a multivalent bacterial vaccine, Purification validation for a therapeutic monoclonal antibody expressed and secreted by Chinese Hamster Ovary CHO cells, Viral clearance validation studies for a product produced in a human cell line. A much needed resource, this book presents process characterization techniques for scaling down unit operations in biopharmaceutical manufacturing including chromatography, chemical modification reactions, ultrafiltration and microfiltration. It also provides practical methods to test raw materials and in process samples. Stressing the importance of taking a risk-based approach towards computerized system compliance, this book will help you and your team ascertain process validation is carried out and exceeds expectations.

The Future of Pharmaceutical Product Development and Research, 2020-08-19 The Future of Pharmaceutical Product Development and Research examines the latest developments in the pharmaceutical sciences, also highlighting key developments, research and future opportunities. Written by experts in the field, this volume in the Advances in Pharmaceutical Product Development and Research series deepens our understanding of the product development phase of drug discovery and drug development. Each chapter covers fundamental principles, advanced methodologies and technologies employed by pharmaceutical scientists, researchers and the pharmaceutical industry. The book focuses on excipients, radiopharmaceuticals and how manufacturing should be conducted in an environment that follows Good Manufacturing Practice (GMP) guidelines. Researchers and students will find this book to be a comprehensive resource for those working in and studying pharmaceuticals, cosmetics, biotechnology, foods and related industries. Provides an overview of practical information for clinical trials. Outlines how to ensure an environment that follows Good Manufacturing Practice (GMP). Examines recent developments and suggests future directions for drug production methods and techniques.
