Socio-economic and Eco-biological Dimensions in Resource use and Conservation Niranjana Roy, Shubhadeep Roychoudhury, Sunil Nautiyal, Sunil K. Agarwal, Sangeeta Bakshi, 2020-01-27 This book presents the outcomes of the 2017 national workshop and international conference organized by CEENR of ISEC Bengaluru and Assam University Silchar Addressing the threats to biodiversity and sustainable development resulting from the impacts of human induced pressures on ecosystems and global warming driven climate change is a major challenge It requires increased knowledge and an enhanced information base in order to devise local policies to improve the adaptive capacity of vulnerable socio ecological systems in developing countries In this context the book presents research that has the potential

to benefit the environment and empower communities It appeals to researchers investigating diverse aspects of socio ecological biological systems to create strategies for resource use conservation and management to ensure sustainability

Gender and Agricultural Development Helen Kreider Henderson,2022-03-29 Agricultural planning and development are crucial to human survival but they usually proceed without any consideration of the importance of gender issues at the production level Although women have long been prime movers in agriculture their contribution to the world s food supply has been largely ignored and consequently their stake in development has been undermined This book is both a resource guide and a review of major issues in gender and agriculture which demonstrates that recognizing the contribution of women to agricultural production is a necessary step in development planning It presents relevant information and research literature regarding women s roles in agriculture in a consolidated and accessible format offering insights into how the inclusion or exclusion of appropriate information at the planning stage can have an impact during implementation It also provides guidelines for locating information on gender related agricultural issues and incorporating it into development planning research and training The literature reviewed not only calls attention to the work women do in order to improve their access to technology and training but also challenges existing development paradigms The issues discussed present women s experiences and local knowledge and allude to gender and class inequities that farming women face Each chapter is intended to help the reader address major gender issues in a specific subject in order to access relevant information and thereby better design and implement appropriate agricultural planning and policies By synthesizing twenty years of international research Gender and Agricultural Development provides an effective tool for development practitioners to use in training programs or surveys in order to ensure the appropriate collection of gender disaggregated data and for educators to integrate gender issues into courses dealing with social aspects of agricultural systems Its findings are presented in such a way as to allow them to be easily incorporated into innovative planning for more sustainable and equitable agricultural policies

Plant Micronutrient Use Efficiency Mohammad Anwar Hossain,Takehiro Kamiya,David Burritt,Lam-Son Phan Tran,Toru Fujiwara,2018-03-23 Plant Micronutrient Use Efficiency Molecular and Genomic Perspectives in Crop Plants presents information on the complex mechanisms regulating micronutrient use efficiency in plants Understanding this science is essential for the development of new varieties of crop plants that are more resilient to micronutrient stress as well as plants with increased bioavailable concentrations of essential micronutrients This book explores the discovery of novel genes and key metabolic pathways associated with micronutrient use efficiency in plants gives an analyses of the gene expression patterns in plants in response to low and or high nutrient levels and investigates the potential functions of these genes and their products Strategies to enhance micronutrient use efficiency and stress tolerance to develop bio fortified crop and to improve the sustainable utilization of natural resources are critically evaluated The book contains both fundamental and advanced information as well as critical commentaries that are useful for those involved in the various fields that make

up the plant sciences Presents in depth information on mineral nutrition including coverage of all the major micronutrients Explores the molecular and genetic aspects of micronutrient use efficiency in crop plants Provides information and critical discussion of the latest developments in the micronutrient biofortification of crop plants with an aim to prevent micronutrient deficiencies in humans Includes contributions from experts in plant micronutrient use efficiency and crop biofortification

Medicinal Plants and Their Bioactives in Human Diseases Kamil Kuca,Jiri Patocka,Vikas Kumar,Rajni Dhalaria,2025-09-26

Medicinal plants offer a promising alternative or complement to conventional therapies due to their natural origin wide availability and potential to provide a broad spectrum of pharmacological effects Bioactive compounds derived from these plants such as alkaloids flavonoids terpenoids and phenolics have shown diverse therapeutic activities including antioxidant anti inflammatory neuroprotective and anti cancer effects The use of medicinal plants could provide safer more holistic approaches to managing chronic and neurodegenerative diseases reducing side effects and improving patient outcomes By focusing on the applications of medicinal plants and their bioactive compounds this book aims to explore the untapped potential of natural products in combating some of the most challenging diseases affecting human health today It will serve as a comprehensive reference for researchers healthcare professionals and students interested in the therapeutic use of plant based compounds and contribute to the advancement of integrative medicine

Hazardous and Trace Materials in Soil and Plants M. Naeem,Tariq Aftab,Abid Ali Ansari,Sarvajeet Singh Gill,Anca Macovei,2022-08-13 Hazardous and Trace Materials in Soil and Plants Sources Effects and Management explores the latest advancements in reducing avoiding and eliminating soil contaminants that challenge the health and safety of agricultural plants With a focus on minimizing the production of those hazardous substances controlling their distribution and ensuring safe utilization the book explores each contributing area and provides insights toward improved sustainable and secure production This is an excellent reference resource on both current research and future directions from laboratory research to field applications The combined impacts of climate change and industrialization have led to increased and diversified threats to the health of the soil in which our food crops are grown as well as in the plants themselves This dual hazard scenario is increasingly recognized as a threat to not just the environment but to global food security as agricultural soils contaminated with pollutants alter plant metabolism thus resulting in reduced crop quality and production quantity Addresses the challenges of mitigating toxic substances in plants including agricultural crops Presents current status and future prospects for managing biotic and abiotic environmental stress factors through plant stress tolerance mechanisms Includes chapters that address both biotic and abiotic stresses agricultural and environmental science toxicology biotechnology nanotechnology and molecular studies Integrates insights and developments between environmental and plant science

Basic and Applied Aspects of Biopesticides K. Sahayaraj,2014-07-10 Currently the major challenge of humanity is focused on population growth through agricultural production in order to meet the demand for food The food crunch is mainly due to pest and disease Traditional methods
