Congress. House. Committee on Education, **The State of Wisconsin Blue Book** , 1991 *A History of the University of Wisconsin System* Patricia A. Brady, 2020-04-07 A tumultuous 1971 merger that combined all of the state s public colleges and universities into a single entity led to the creation of the University of Wisconsin System Drawing on decades of previously unpublished sources Patricia A Brady details the System s full history from its origin to the present illuminating complex networks among and within the campuses and an evolving relationship with the state The UW System serves as a powerful case study for how broad national trends in higher education take shape on the ground Brady illustrates the ways culture wars have played out on campuses and the pressures that have mounted as universities have shifted to a student as consumer approach This is the essential unvarnished story of the unique collection of institutions that serve Wisconsin and the world and a convincing argument for why recognizing and reinvesting in the System is critically important for the economic and civic future of the state and its citizens **Blue Book** , 1981 *Get Out of College and Get on with Your* Neal Prochnow, 2005-05 **The University of Wisconsin - Renewal to Revolution, 1945-71** E. followed nearly three decades of experiments compromises and political struggles involving several governors Dealing with Foreign Students and Scholars in an Age of Terrorism United States. Congress. House. Committee on Science,2003

Knowledge and Money Roger L. Geiger,2004-05-04 Market forces have profoundly affected the contemporary research university s fundamental tasks of creating and disseminating knowledge They arguably have provided American universities access to greater wealth better students and stronger links with the economy Yet they also have exaggerated inequalities diminished the university s control over its own activities and weakened the university s mission of serving the public Incorporating twenty years of research and new data covering 99 research universities *Knowledge and Money* explains this paradox by assessing how market forces have affected universities in four key spheres of activity finance undergraduate education primary research and participation in regional and national economic development The book begins by chronicling how universities have enlarged revenues by optimizing tuitions and how they have managed these funds It reveals why competition for the best students through selective undergraduate admissions has led to increased student consumerism and weakened university control over learning The book also explains why research has become an increasingly autonomous activity within the university expanding faster than class instruction or faculty resources Finally it shows how the linkage of research to economic development has engendered closer ties with industry and encouraged the commercialization of knowledge Encyclopedia of Library and Information Science Allen Kent,Harold Lancour,Jay E. From Form to Meaning David Fleming, 2011-06-12 In the spring of 1968 the English faculty at the University of Wisconsin Madison UW voted to remedialize the first semester of its required freshman composition course English 101 The following year it eliminated outright the second semester course English 102 For the next quarter century UW had no real campus wide writing requirement putting it out of step with its peer institutions and preventing it from fully joining the composition revolution of the 1970s In *From Form to Meaning* David Fleming chronicles these events situating them against the backdrop of late 1960s student radicalism and within the wider changes taking place in U S higher education at the time Fleming begins with the founding of UW in 1848 He examines the rhetorical education provided in the university's first half century the birth of a required two semester composition course in 1898 faculty experimentation with that course in the 1920s and 1930s and the rise of a massive current traditional writing program staffed primarily by graduate teaching assistants TAs after World War II He then reveals how starting around 1965 tensions between faculty and TAs concerning English 101 102 began to mount By 1969 as the TAs were trying to take over the committee that supervised the course the English faculty simply abandoned its long standing commitment to freshman writing In telling the story of composition's demise at UW Fleming shows how contributing factors the growing reliance on TAs the questioning of traditional curricula by young instructors and their students the disinterest of faculty in teaching and administering general education courses were part of a larger shift affecting universities nationally He also connects the events of this period to the long embattled history of freshman composition in the United States And he offers his own thoughts on the qualities of the course that have allowed it to survive and regenerate for over 125 years
