Vaal Applications For 2015:

Environmental Science and Information Application Technology David Chan, 2015-06-29 Environmental Science and Information Application Technology contains selected papers from the 2014 5th International Conference on Environmental Science and Information Application Technology ESIAT 2014 Hong Kong 7 8 November 2014 The book covers a wide variety of topics Global Environmental Change and Ecosystems Management Graphic and I **Additive**

Manufacturing: Materials, Processes, Quantifications and Applications Jing Zhang, Yeon-Gil Jung, 2018-05-17 Additive Manufacturing Materials Processes Quantifications and Applications is designed to explain the engineering aspects and physical principles of available AM technologies and their most relevant applications It begins with a review of the recent developments in this technology and then progresses to a discussion of the criteria needed to successfully select an AM technology for the embodiment of a particular design discussing material compatibility interfaces issues and strength requirements The book concludes with a review of the applications in various industries including bio energy aerospace and electronics This book will be a must read for those interested in a practical comprehensive introduction to additive manufacturing an area with tremendous potential for producing high value complex individually customized parts As 3D printing technology advances both in hardware and software together with reduced materials cost and complexity of creating 3D printed items these applications are quickly expanding into the mass market Includes a discussion of the historical development and physical principles of current AM technologies Exposes readers to the engineering principles for evaluating and quantifying AM technologies Explores the uses of Additive Manufacturing in various industries most notably aerospace medical energy and electronics **Entropy Applications in Environmental and Water Engineering** Huijuan Cui, Bellie

Sivakumar, Vijay P. Singh, 2019-03-07 Entropy theory has wide applications to a range of problems in the fields of environmental and water engineering including river hydraulic geometry fluvial hydraulics water monitoring network design river flow forecasting floods and droughts river network analysis infiltration soil moisture sediment transport surface water and groundwater quality modeling ecosystems modeling water distribution networks environmental and water resources management and parameter estimation Such applications have used several different entropy formulations such as Shannon Tsallis R nyi Burg Kolmogorov Kapur configurational and relative entropies which can be derived in time space or frequency domains More recently entropy based concepts have been coupled with other theories including copula and wavelets to study various issues associated with environmental and water resources systems Recent studies indicate the enormous scope and potential of entropy theory in advancing research in the fields of environmental and water engineering including establishing and explaining physical connections between theory and reality The objective of this Special Issue is to provide a platform for compiling important recent and current research on the applications of entropy theory in environmental and water engineering The contributions to this Special Issue have addressed many aspects associated with entropy theory applications

and have shown the enormous scope and potential of entropy theory in advancing research in the fields of environmental and water engineering

Modified Nanomaterials for Environmental Applications Onoyivwe Monday Ama, Suprakas Sinha Ray, Peter Ogbemudia Osifo, 2021-11-16 This book focuses on the electrochemical and nanostructural properties of new photoanode electrolyte combinations used in the development of novel surface modified nanomaterials for environmental applications As water treatment is rapidly becoming a global challenge due to the increasing complexity and number of the various pollutants present the book explores fundamental issues relating to environmental applications of nanomaterials It addresses relevant topics ranging from electrochemical synthesis and characterization to applications of photoanodes in corrosion prevention and biosensors for wastewater treatment Featuring up to date experimental results on nanomaterials for detection of pharmaceuticals and heavy metals in wastewater this contributed volume is useful to electrochemical researchers materials scientists and chemical and civil engineers interested in advanced photoelectrochemical research for environmental applications

The International Conference on Advanced Machine Learning Technologies and Applications (AMLT2018) Aboul Ella Hassanien, Mohamed F. Tolba, Mohamed Elhoseny, Mohamed Mostafa, 2018-01-25 This book presents the refereed proceedings of the third International Conference on Advanced Machine Learning Technologies and Applications AMLTA 2018 held in Cairo Egypt on February 22 24 2018 and organized by the Scientific Research Group in Egypt SRGE The papers cover current research in machine learning big data Internet of Things biomedical engineering fuzzy logic security and intelligence swarms and optimization

Research Methods: Concepts, Methodologies, Tools, and Applications Management Association, Information Resources, 2015-01-31 Across a variety of disciplines data and statistics form the backbone of knowledge To ensure the reliability and validity of data appropriate measures must be taken in conducting studies and reporting findings Research Methods Concepts Methodologies Tools and Applications compiles chapters on key considerations in the management development and distribution of data With its focus on both fundamental concepts and advanced topics this multi volume reference work will be a valuable addition to researchers scholars and students of science mathematics and engineering

Handbook of Research on Smart Technology Applications in the Tourism Industry Çeltekin, Evrim, 2020-01-17 In today's modernized society certain technologies have become more applicable within many professional fields and are much easier to implement This includes the tourism industry where smart technology has provided a range of new marketing possibilities including more effective sales tactics and delivering a more personalized customer experience As the scope of business analytics continues to expand professionals need research on the various applications of smart technology within the field of tourism The Handbook of Research on Smart Technology Applications in the Tourism Industry is an essential reference source that discusses the use of intelligent systems in tourism as well as their influence on consumer relationships Featuring research on topics such as digital advertising wearable technology and consumer behavior this book is ideally designed for travel agents tour developers

restaurateurs hotel managers tour directors airlines marketers researchers managers hospitality professionals policymakers business strategists researchers academicians and students seeking coverage on the use of smart technologies in tourism

Implementing Environmental Constitutionalism Erin Daly, James R. May, 2018-05-31 Constitutions can play a central role in responding to environmental challenges such as pollution biodiversity loss lack of drinking water and climate change The vast majority of people on earth live under constitutional systems that protect the environment or recognize environmental rights Such environmental constitutionalism however falls short without effective implementation by policymakers advocates and jurists *Implementing Environmental Constitutionalism Current Global Challenges* explains and explores this implementation gap This collection is both broad and deep While some of the essays analyze crosscutting themes such as climate change and the need for rule of law that affect the implementation of environmental constitutionalism throughout the world others delve deeply into geographically contextual experiences for lessons about how constitutional environmental law might be more effectively implemented This volume informs global conversations about whether and how environmental constitutionalism can be made more effective to protect the natural environment

Enhanced Chitosan Material for Water Treatment Ephraim Igberase, Peter Ogbemudia Osifo, Tumisang Seodigeng, Ikenna Emeji, 2021-04-29 This book reviews some of the latest developments in the field of water treatment using multi functional chitosan based materials It covers the production of chitosan beads and membranes from chitosan powder as well as modification techniques for enhancing the material for commercial and industrial purposes The book summarizes the results of experimental adsorption desorption studies for elucidating the underlying reaction mechanism of heavy metal removal from wastewater presenting an advanced overview of an array of characterization techniques such as Fourier transform infrared spectroscopy thermogravimetric analysis x ray diffraction and scanning electron microscopy Additionally it features a look at the development and application of specialized engineering software and image analysis for modelling the kinetics of adsorption This book is ideal for scientists and engineers working in the broader field of environmental materials science It is all well suited for chemists as well as industrial and civil engineers interested in wastewater treatment and mitigation of water pollution

Theoretical Orientations and Practical Applications of Psychological Ownership Chantal Olckers, Llewellyn van Zyl, Leoni van der Vaart, 2017-11-27 This book shares the theoretical advancements that have been made regarding psychological ownership since the development of the construct and specifically the practical applications within multi cultural and cross cultural environments Enriched by empirical data and case studies by subject specialists in the field this book serves as a cutting edge benchmark for human resource management specialists industrial psychologists as well as students in positive organizational psychology and professionals in other fields This book follows an in depth view of the most recent research trends in psychological ownership Offering practical tools of how the psychological ownership of employees could be developed in the workplace to not only enhance the performance of organisations but to increase the commitment of

employees and influence the intentions of skilled employees to remain with their organisations

Multi-purposeful Application of Geospatial Data Rustam B. Rustamov, Sabina Hasanova, Mahfuza H. Zeynalova, 2018-05-09 This book is dedicated toward space technology application in Earth studies based on the use of a variety of methods for satellite information classification and interpretation Advantages of geospatial data use in a large scale area of observation and monitoring as a source of decision making stage have been demonstrated The book describes navigation systems providing data estimation method and review of existing data in the literature relevant to remote sensing sensors delivering main information electromagnetic spectrum and a variety of sensor applications This aspect is important when combining integrating satellite data processing into the field measurements Satellites and satellite data application for the study of Earth features have been demonstrated as the next step of geospatial data application The use of different purposeful processing technology applications of satellite data is one of the vital aspects of space technology advances The use of GNSS GPS technology in industry and MODIS images and data interpretation for agriculture purposes has been presented It was the aim of the book to create an attractive environment by presenting space technology application in the wide areas of Earth study For this purpose some of the book chapters are dedicated toward space technology advances in climate monitoring natural disaster factor detection satellite data processing optimization and GIS technology for meteorology information with the aim of agriculture developments

River Basin Management José Simão Antunes Do Carmo, 2021-04-21 This book addresses recent advances in the field of river systems Chapters cover a wide range of topics including artificialization of rivers and banks technical aspects of flood and sediment dynamics physical processes and institutional vulnerabilities watershed management and collaborative governance water quality analysis and protection measures acquisition and measurement of data statistical and econometric procedures adaptation and restoration measures rehabilitation and sustainability of riparian ecosystems and strategies to improve the ecological functions of riparian areas All chapters contribute relevant information and useful content for scientists and other readers interested or concerned about the lack of adequate management actions and implementation of appropriate measures and protections or their ineffectiveness in containing vulnerabilities and ecological sustainability of river systems

Afrotropical Streams and Rivers Tatenda Dalu, Frank Masese, 2024-11-09 The Afrotropical Streams and Rivers Structure Ecological Processes and Management is a comprehensive guide that provides assessment of major rivers and tributaries in Africa Unlike other books available the editors present a thorough study of geomorphological hydrological biological and ecological processes incorporating a range of plant and animal communities while considering implications of human communities that depend upon them This book edited by a diverse cohort of researchers and or scholars is intended as an educational and practical guide for graduate students researchers and scientists who focus on the biodiversity conservation and management policy issues of the African river systems Provides a comprehensive introduction to African freshwater rivers their biota and abiotic processes Contains

unique case studies on African streams and rivers Organised around an interdisciplinary approach that covers the complex aspects of conservation and management of African river systems on the continent *Positive Organizational Interventions: Contemporary Theories, Approaches and Applications* Llewellyn Ellardus Van Zyl, Sebastiaan Rothmann, 2021-01-05

Kidney Transplantation - Principles and Practice E-Book Stuart J. Knechtle, Lorna P. Marson, Peter J Morris, 2019-08-31 Offering practical guidance for all members of the transplant team Kidney Transplantation Principles and Practice 8th Edition provides the balanced up to date information you need to achieve optimal outcomes for your patients A global team of internationally renowned surgeons and nephrologists many new to this edition offers fresh perspectives on everything from applied science and surgical techniques to immunosuppressive methods outcomes risks and medical considerations related to kidney transplantation in both adults and children Offers state of the art coverage of all areas of kidney transplantation such as preservation of kidneys mechanisms of rejection and the induction of tolerance techniques of laparoscopic live donor nephrectomy and immunosuppression Contains up to date outcomes data and analysis of the evidence supporting current practice in the field Includes new information on desensitization and considerable new data on the clinical use of costimulation blockade Keeps you current with new chapters on kidney allocation policy that reflects the ethical and societal values of different countries and populations and biomarkers of kidney injury and rejection including the need for better monitoring tools to guide therapy and patient management Covers hot topics such as management of chronic allograft failure the sensitized patient and antibody mediated rejection and paired exchange principles Features hundreds of superb illustrations to help you visualize key concepts and nuances of renal transplantation Provides dynamic visual guidance with new real time video coverage of ultrasound guided pancreas allograft biopsy a new animation of calcineurin inhibitor mechanism of action animation and videos that demonstrate the formation of an immune synapse 3 D rotational images of immune synapses an NK cell killing its target peritoneal dialysis catheter insertion techniques laparoendoscopic single site LESS donor nephrectomy and more Enhanced eBook version included with purchase which allows you to access all of the text figures and references from the book on a variety of devices **Water Resources Monitoring, Management, and Sustainability** Subodh Chandra Pal, Shouraseni Sen Roy, Asish Saha, Mohamed Abioui, 2024-09-02 Water Resources Monitoring Management and Sustainability Application of Geostatistics and Geospatial Modeling Volume 16 a new volume in the Developments in Environmental Science series introduces a variety of advanced modeling techniques like changing climate and land use land cover hydrological models and machine learning approaches These techniques are applied to address water resources and environmental monitoring as well as planning and sustainable management of water resources Further the book discusses how to manage water resources at various local regional and international levels while incorporating environmental considerations Finally it delves into cutting edge techniques based on open source software and R statistical programming Google Earth Engine and modeling in modern artificial intelligence techniques with a particular

emphasis on recent trends in datamining techniques and robust modeling in water resource crisis related hazards Provides essential information on new methods for managing water resources to minimize the global water crisis Illustrates a geospatial technology approach to datamining techniques data analysis modeling risk assessment and visualization and management strategies in many elements of natural and societal hazards Includes works that address the connection between water climate change and the environment

Mine Seismology: Seismic Response to the Caving Process S.N. Glazer, 2018-08-01 This book presents the results of seismic data analysis and interpretation based on nearly one million seismic events This seismicity was induced by the caving process in four copper mines each located on a different continent The book not only serves as an interpretation guide it also illustrates the benefits of evaluating data from different mines How to establish which seismic data base is faulty and why The formation of a universal seismic response to the caving process Indisputable evidence that hydro fracturing improves underground safety This book invites discussion on more general aspects of research such as Basic research applied research and implementation Predicting mine induced seismic events Quantitative versus qualitative seismology Research versus pseudo research What is genuine research In the Parlabora Mine Stefan has demonstrated that the use of the seismic system was a very practical means of monitoring the progression of the cave up to and beyond break through into the open pit above The seismic system was vital in drawing up the undercutting and seismic protocols and determining the maximum potential seismic hazard level Peter Townsend Retired Mine Manager and Consultant I consider Stefan the pioneer of using microseismic data to provide understanding of the mechanism and progress of cave mining Science has advanced considerably since the use of less than reliable extensometers to monitor the cave back position and Stefan was leading this advance This book provides a lot of useful insight s in how we can best understand the data that we gather and how to change this data into useful information Neil Hepworth C Eng MIMMM Geomin Consultorio Brazil Consultant Mining and Geotechnics Stefan mine seismology trilogy is a comprehensive tutoring on how to analyse and interpret mine induced seismicity This coaching is based on multiple practical examples presented from the problem to be solved with input data tests followed by analysis and interpretation This last is presented with many details that explain the whole process Mahdi Bayuargo ST MAScPT Duaem Gada Bayuagus Managing Director

Climate Litigation and Justice in Africa Kim Bouwer, Uzuazo Etemire, Tracy-Lynn Field, Ademola Oluborode Jegede, 2024-01-25 EPDF and EPUB available Open Access under CC BY NC ND licence In recent years climate litigation has become an important subject of global scholarly and policy interest However developments within the Global South particularly in Africa have been largely neglected This volume brings together an international team of contributors to provide a much needed examination of climate litigation in Africa The book outlines how climate litigation in Africa is distinct as well as pinpointing where it connects with the global conversation Chapters engage with crucial themes such as human rights approaches to climate governance corporate liability and the role of gender in climate litigation Spanning a range of

approaches and jurisdictions the book challenges universal concepts around climate and the role of activism including litigation in seeking to advance climate governance

Development in Waste Water Treatment Research and Processes Maulin P. Shah, Nidhi Shah, 2024-06-19 Development in Waste Water Treatment Research and Processes Role of Environmental Microbiology in Industrial Wastewater Research focuses on environmental bioremediation concepts providing a comprehensive view of recent trends and emerging technologies in environmental bioremediation addressing current limitations and challenges pertaining to generally accepted and applied bioremediation strategies and discussing corrective strategies for the removal of pollutants from the environment Describing the broader role of environmental microbiology specifically in the treatment of industrial wastewater research the book includes sections on the recovery of resources from wastewater that will be of interest to environmental microbiologists biotechnologists environmental engineers chemical engineers and those working in the bioremediation field Describes the importance of microorganisms in environmental bioremediation technologies Points out the reuse of treated wastewater through emerging technologies Pays special attention to the occurrence of novel micro pollutants
