Teacher Personal Theorizing E. Wayne Ross, Jeffrey Cornett, Gail McCutcheon, 1992-09-09 This book examines the relationship between teacher theorizing and teacher action as illustrated by the curricular and instructional practices of teachers The authors show that all teaching is guided by theory developed by the teachers Teachers could not begin to practice without some knowledge of the context of their practice and without ideas about what can and should be done in those circumstances In this sense teachers are guided by personal practical theories that structure their activities and guide them in making decisions This literature is very significant in explaining and interpreting many phenomena of schooling such as why teachers alter curriculum documents and other policies how inservice education can be improved how supervisors can help teachers to improve their practices and how administrators can become leaders to improve education This perspective has broad and specific implications for every facet of education Those interested in teacher education and development in supervision in curriculum and in administration will find it especially relevant *Materials Development in Language Teaching* Brian Tomlinson, 2011-04-07 *Materials Development in Language Teaching* aims to help readers apply current theoretical principles and research findings to the practical realities of developing and exploiting classroom materials The authors also suggest new ideas and directions in materials development which readers can pursue for themselves This book is accessible to readers with little previous experience in the field and is essential reading for all those involved in developing materials for language teaching In the second edition of this highly popular title each chapter has been comprehensively revised and updated to take into account both recent research and the significant technological developments since the first edition was published in 1998 Two new chapters have been added to assess the potential of electronic media for materials development These chapters include an overview of the technologies available as well as individual case studies and activities Becoming Teachers of Inner-city Students James C. Jupp, 2013-11-19 *Becoming Teachers of Inner city Students* takes on the continuing challenges of White teachers in increasingly de facto re segregated schools of the present Drawing on the author s eighteen years of experience as a classroom teacher and his research on White teachers of inner city students *Becoming Teachers* provides key discussions on professional identity for preservice teachers professional educators and researchers interested in diversity education or urban education Driving at complex recognitions of race class culture language and gender as a basis for teaching and learning with diverse urban students the author s and other White teachers life and teaching stories move beyond prescriptive models of professional identity for preservice and professional teachers to follow Instead life and teaching stories in *Becoming Teachers* demonstrate again and again that in teaching the personal is political professional knowledges are forged in practice and overall that becoming a

professional teacher is a process that draws on one's experiences and innermost convictions. *Becoming Teachers* updating Vivian Paley's *White Teacher* and reworking Christine Sleeter's multicultural research on White teachers' race evasive identities moves discussions on White teacher identity toward a second wave of race visible professional identity for White teachers in the present. James Jupp's book is an instruction on how to keep the democratic educational experiment on the workbench. Roger Slee, Professor and Director of the Victoria Institute for Education Diversity and Life Long Learning at Victoria University Melbourne, James Jupp thoughtfully explicates the complexity of the social justice literature in education related to race, class, culture, language, gender, and other differences in classrooms. Jupp is one of the leading scholars in education who challenges static notions of difference and opens up new curriculum spaces for a second wave of critical race work. Challenging the field to consider more nuanced possibilities that will advance social justice in the present, Jupp provides generous readings for new intercultural alliances. Jupp's *Becoming Teachers of Inner-city Students* offers a fresh understanding for those who are looking for new ways to understand teachers' lives and professional identities. Patrick Slattery, Professor of Curriculum, Texas A M University, Jupp does the hard work here of understanding where we have been in conceptualizing the racial identities of White teachers. And then he does something harder. With abundant intelligence, courage, and generosity, Jupp opens up new pathways for our thinking and feeling and action. Read this book. Each of the volume's 23 chapters is a canonical piece that will serve as a reference tool for the field. The *Handbook* provides readers with an unparalleled view of the current state of research on teaching across its multiple facets and related fields. **The Teaching Brain** Vanessa Rodriguez, Michelle Fitzpatrick, 2011-05-10. A significant contribution to understanding the interaction among teachers, students, the environment, and the content of learning. Herbert Kohl, education advocate and author. What is at work in the mind of a five-year-old explaining the game of tag to a new friend? What is going on in the head of a thirty-five-year-old parent showing a first grader how to button a coat? And what exactly is happening in the brain of a sixty-five-year-old professor discussing statistics with a room full of graduate students? While research about the nature and science of learning abounds, shockingly few insights into how and why humans teach have emerged until now. Countering the dated yet widely held presumption that teaching is simply the transfer of knowledge from one person to another, *The Teaching Brain* weaves together scientific research and real-life examples to show that teaching is a dynamic interaction and an evolutionary cognitive skill that develops from birth to adulthood. With engaging, accessible

prose Harvard researcher Vanessa Rodriguez reveals what it actually takes to become an expert teacher At a time when all sides of the teaching debate tirelessly seek to define good teaching or even how to build a better teacher The Teaching Brain upends the misguided premises for how we measure the success of teachers A thoughtful analysis of current educational paradigms Rodriguez s case for altering pedagogy to match the fluctuating dynamic forces in the classroom is both convincing and steeped in common sense Publishers Weekly
