Auer, Samir A.

El-Seoud, Omar H. Karam, 2022-10-14 Nowadays online technologies are the core of most fields of engineering and the whole society and are inseparable connected for example with Internet of Things Industrial Internet of Things Industry 4.0 Online Biomedical Engineering Data Science Machine Learning and Artificial Intelligence Cross Mixed Reality and Remote Working Environments to name only a few Since the first REV conference in 2004 we tried to focus on the upcoming use of the

Internet for engineering tasks and the opportunities as well as challenges around it. Consequently the motto of this year's REV2022 was Artificial Intelligence and Online Engineering. In a globally connected world the interest in online collaboration, teleworking, remote services and other digital working environments is rapidly increasing. In response to that the general objective of this conference is to contribute and discuss fundamentals, applications and experiences in the field of Online and Remote Engineering, Virtual Instrumentation and other related new technologies like Cross Reality, Data Science, Big Data, Internet of Things, Industrial Internet of Things, Industry 4.0, Cyber Security and M2M Smart Objects. Another objective of the conference is to discuss guidelines and new concepts for engineering education in higher and vocational education institutions including emerging technologies in learning, MOOCs, MOOLs and Open Resources. REV2022 was the 19th in a series of annual events concerning the area of Online Engineering. It has been organized in cooperation with The British University in Egypt (BUE) Cairo as a hybrid event from February 28 until March 02, 2022.

Advances in Intelligent Systems and Computing II Natalia Shakhovska, Volodymyr Stepashko, 2017-11-20. This book reports on new theories and applications in the field of intelligent systems and computing. It covers computational and artificial intelligence methods as well as advances in computer vision, current issues in big data and cloud computing, computation, linguistics and cyber physical systems. It also reports on data mining and knowledge extraction technologies as well as central issues in intelligent information management. Written by active researchers, the respective chapters are based on papers presented at the International Conference on Computer Science and Information Technologies (CSIT) 2017 held on September 5-8, 2017 in Lviv, Ukraine, and at two workshops accompanying the conference: one on inductive modeling jointly organized by the Lviv Polytechnic National University and the National Academy of Science of Ukraine, and another on project management which was jointly organized by the Lviv Polytechnic National University, the International Project Management Association, the Ukrainian Project Management Association, the Kazakhstan Project Management Association and Nazarbayev University. Given its breadth of coverage, the book provides academics and professionals with extensive information and a timely snapshot of the field of intelligent systems and is sure to foster new discussions and collaborations among different groups.

and Information Systems William B. Rouse,Andrew P. Sage,2007 This volume brings together several perspectives on the nature of work processes in enterprises and how information systems can best support these processes The genesis of this idea was the shared interests of the authors in how enterprises improve and change The shared belief is that change of

enterprises relates to change of work processes and the success of such changes relates to how work processes are supported by information systems Thus the papers in this volume address both the nature of work and the design of information systems to support work This volume is divided into two main sections work and workflow and information systems There are three papers in each section The disciplines represented across these six papers include management engineering computing and architecture These four disciplines pursue work workflow and information systems from quite different perspectives management to represent business practices and processes engineering to represent the physical flows in the system computing to represent the information flows and architecture to represent human flows within and among physical spaces Enterprises of course include all these types of flows

The Semantic Web - ISWC 2005 Yolanda Gil, Enrico Motta, V. Richard Benjamins, Mark Musen, 2005-10-17 A little over a decade has passed since the release of the first Netscape browser In 1995 the World Wide Web was viewed largely as an academic curiosity Now of course the Web is an integral part of the fabric of modern society It is impossible to imagine science education commerce or government functioning without the Web We take the Web for granted and often assume that Internet connectivity is guaranteed to all of us as a birthright Although the Web indeed has become world wide and has lost a bit of its original aura as a consequence of its ubiquity a burgeoning community of researchers and practitioners continues to work toward the next generation of the Web a Web where information will be stored in a machine processable form and where intelligent computer based agents will access and automatically combine myriad services on the Internet of the kind that are now available only to people interacting directly with their Web browsers
