Revolutionary Parks Emily Wakild, 2011 Winner of the Alfred B Thomas Award Southeastern Council of Latin American Studies Revolutionary Parks tells the surprising story of how forty national parks were created in Mexico during the latter stages of the first social revolution of the twentieth century By 1940 Mexico had more national parks than any other country Together they protected more than two million acres of land in fourteen states Even more remarkable L zaro C rdenas president of Mexico in the 1930s began to promote concepts akin to sustainable development and ecotourism Conventional wisdom indicates that tropical and post colonial countries especially in the early twentieth century have seldom had the ability or the ambition to protect nature on a national scale It is also unusual for any country to make conservation a political priority in the middle of major reforms after a revolution What emerges in Emily Wakild s deft inquiry is the story of a nature protection program that takes into account the history society and culture of the times Wakild employs case studies of four parks to show how the revolutionary momentum coalesced to create early environmentalism in Mexico According to Wakild Mexico s national parks were the outgrowth of revolutionary affinities for both rational science and social justice Yet rather than reserves set aside solely for ecology or politics rural people continued to inhabit these landscapes and use them for a range of activities from growing crops to producing charcoal Sympathy for rural people tempered the radicalism of scientific conservationists This fine balance between recognizing the morally valuable if not always economically profitable work of rural people and designing a revolutionary state that respected ecological limits proved to be a radical episode of government foresight Ultimate Guide for FCI Assistant Grade - III Recruitment Exam Paper 1 & 2 Disha

Ghosts of the Somme Jonathan Evershed,2018-05-30 Once assumed to be a driver or even cause of conflict commemoration during Ireland's Decade of Centenaries came to occupy a central place in peacebuilding efforts The inclusive and cross communal reorientation of commemoration particularly of the First World War has been widely heralded as signifying new forms of reconciliation and a greater maturity in relationships between Ireland and the UK and between Unionists and Nationalists in Northern Ireland In this study Jonathan Evershed interrogates the particular and implicitly political claims about the nature of history memory and commemoration that define and sustain these assertions and explores some of the hidden and countervailing transcripts that underwrite and disrupt them Drawing on two years of ethnographic fieldwork conducted in Belfast Evershed explores Ulster Loyalist commemoration of the Battle of the Somme its conflicted politics and its confrontation with official commemorative discourse and practice during the Decade of Centenaries He investigates how and why the myriad social political cultural and economic changes that have defined postconflict Northern Ireland have been experienced by Loyalists as a culture war and how commemoration is the means by which they confront and challenge the perceived erosion of their identity He reveals the ways in which this brings Loyalists into conflict not only with the politics of Irish Nationalism but with the peacebuilding state and crucially with each other He demonstrates how commemoration works to reproduce the intracommunal conflicts that it claims to have overcome and interrogates its

nuanced and perhaps counterintuitive function in conflict transformation *Translations on Sub-Saharan Africa* United States.
