[Return to the Shadows](#) Alison Pargeter,2016-09-22 The Arab Spring heralded a profound shift in the Middle East bringing to power Islamist movements which had previously been operating in the shadows The Muslim Brotherhood stormed to victory in Egypt and emerged as a key player in Libya s nascent political arena Meanwhile An Nahda found itself catapulted into power as the head of Tunisia s coalition government For a while it looked as though the region was entering the dawn of a new Islamist age But navigating their respective countries through difficult and painful transitions ultimately proved too challenging for these forces and just as suddenly the Brotherhood was dramatically overthrown in Egypt and left severely weakened in Libya In Tunisia An Nahda managed to pull itself through the crisis but its failure to articulate and deliver the hopes and aspirations of a large section of Tunisian society damaged its credibility In this authoritative account Alison Pargeter expertly charts the Islamists ascent and subsequent fall from power Based on extensive research and interviews with high ranking members of the Brotherhood and An Nahda Pargeter offers a comparative analysis of the movement in North Africa since the Arab Spring and outlines the consequences of the Brotherhood s decline on both the region and the wider Islamist political project

[China's Bilateral Relations with Its Principal Oil Suppliers](#) George G. Eberling,2017-10-23 This book examines China s bilateral relations with its established suppliers of crude petroleum and on occasion petroleum gas products including liquefied natural gas LNG based on a five dimensional framework political diplomatic relations economic trade relations military security relations cultural relations and petroleum energy relations A five dimensional approach is comprehensive in nature and offers a complete understanding

of China's complex relationships rather than looking solely on more typical perspectives like bilateral trade security relationships or energy ties. More often than not, social science literature focuses on one or more aspects of China's bilateral relations which does not provide a complete picture of the complex nature of its interstate ties. This book endeavors to bridge this gap and look more substantially at China's bilateral relationships with energy/petroleum relations being the key aspect linking each one of them. The specific bilateral relationships examined are China's relations with Angola, Brazil, Republic of the Congo, Iran, Iraq, Kazakhstan, Kuwait, Oman, Russia, Saudi Arabia, South Sudan, Sudan, United Arab Emirates, and Venezuela. These countries matter because their crude petroleum and petroleum gas product exports account for over 50 percent of China's annual oil consumption.

Human rights and democratic governance in Kenya: A post-2007 appraisal John Osogo Ambani, Nicholas Wasonga Orago, Ochieng Walter Khobe, Paul Ogendi, Winifred Kamau, Conrad Bosire, Ken Obura, Juliet Okoth, Ruth Aura-Odhiambo, 2015-08-21. This publication is a collection of essays on human rights and democratic governance in Kenya in the period after the 2007 post-elections violence. After surviving the trauma of electoral violence, the country soon embarked on a journey towards reconstruction by engaging in, among other things, intense re-evaluation of the then existing system of laws and institutions. In the process, the daunting task has been to reverse the flawed systems that have been in existence for many decades and in their place entrench systems that would promote and respect democratic governance and human rights. This publication therefore documents the extent of the country's reconstruction since 2007 and makes recommendations for the way forward for the recovery of the state.

Borderless Worlds for Whom? Anssi Paasi, Eeva-Kaisa Prokkola, Jarkko Saarinen, Kaj Zimmerbauer, 2018-10-25. The optimism heralded by the end of the Cold War and the idea of an emerging borderless world was soon shadowed by conflicts, wars, terrorism, and new border walls. Migrants, asylum seekers, and refugees have simultaneously become key political figures. Border and mobility studies are now two sides of the same coin. The chapters of this volume reflect the changing relations between borders, bordering practices, and mobilities. They provide both theoretical insights and contextual knowledge on how borders, bordering practices, and ethical issues come together in mobilities. The chapters scrutinize how bounded territorial and open

networked relational spaces manifest in various contexts The first section Borders in a borderless world raises theoretical questions The second Politics of inclusion and exclusion looks at bordering practices in the context of migration The third section Contested mobilities and encounters focuses on tourism which has been an accepted form of mobility but which has recently become an object of critique because of overtourism Section four Borders security politics examines bordering practices and security in the EU and beyond highlighting how the migration border politics nexus has become a national and supra national political challenge The chapters of this interdisciplinary volume contribute both conceptually and empirically to understanding contemporary bordering practices and mobilities It is essential reading for geographers political scientists sociologists and international relations scholars interested in the contemporary meanings of borders and mobilities

South China Sea Developments And Implications For Freedom Of Navigation Arabinda Acharya, Antara Desai, 2021-08-18 The South China Sea SCS has emerged as a theatre of political economic and security concerns not only for the countries in the region but also for the world at large Contrary to conventional wisdom the SCS issue is not about contestation over territory or control over resources alone With military facilities including airstrips and artificial islands or structures being built in the area concerns about freedom of navigation and the right to innocent passage have also become an overwhelming security issue and made the SCS region a flashpoint which according to many assessments can lead to confrontations including those involving conventional military means

Disruption of maritime passage could also hamper trade and commerce with very negative impacts on the economic development of the region and other countries. It is now being held that China could also be using the SCS disputes as part of a concerted effort to deflect geo-political pressures on account of the COVID-19 pandemic related cover-ups and misinformation. This book explores the historical and strategic context of the South China Sea disputes and makes an assessment of the implications of the same for freedom of navigation and other regimes at sea.
