territory into a lasting people's home. And unlike many of its counterparts elsewhere, this is a programme still ongoing today, a case of history in progress as Hong Kong now boasts one of the world's longest lasting public housing programmes. During that time, it has been not just a mirror of the cultural and economic values of Hong Kong society but also a reflection of more nebulous, fast-changing perceptions of identity and a testament to the community building achievements of Hongkongers over these years. This authoritative study combines architectural history with the broader social, political and cultural aspects of housing production, particularly the geo-political issues of sovereignty and decolonisation that uniquely and fundamentally structured the trajectory of Hong Kong public housing and territory development. Exploring the relationship between built form, ideology and administrative governance, it shows how massive state intervention interacted at times uneasily with Hong Kong's dominant *laissez faire* ethos to help maintain the legitimacy of successive administrations during an era of auto-decolonisation and support an interstitial society suspended between two sovereignties. Following more recent political changes, Hong Kong's public housing heritage has also become a focus of nostalgic community pride, a monumental achievement of home building which this book documents and celebrates for posterity. Monthly Catalogue, United States Public Documents, 1985 **Middle East Economic Digest**, 2006 **Show Me the Bodies** Peter Apps, 2022-11-10

WINNER OF THE ORWELL PRIZE FOR POLITICAL WRITING 2023. Never before in years of reviewing books about buildings has one brought me to tears. This one did. Rowan Moore, Observer Book of the Week. On 14 June 2017, a 24-storey block of flats went up in flames. The fire climbed up cladding as flammable as solid petrol. Fire doors failed to self-close. No alarm rang out to warn sleeping residents. As smoke seeped into their homes, all were told to stay put. Many did, and they died. It was a tragedy decades in the making. Peter Apps meticulously exposes how a steady stream of deregulation, corporate greed and institutional indifference caused a tragedy 72 people did not need to die as the Grenfell Tower Inquiry makes clear. Here is the story of a grieving community forsaken by our government, a community still waiting for justice. *Rise of the North East* Research and Information System for Developing Countries (RIS), 2022-10-31. This book gives a detailed assessment of the scope for strengthening economic capacities across sectors, ensuring economic prosperity through connectivity and discusses the resource gaps. It comprehensively captures the wide range of economic possibilities existing in the north-eastern region of India in terms of sectors, local resources and expertise. Further, the book identifies gaps in supply chains and host of other factors around limited economic capacities and continued connectivity deficiencies that hold the region back. Key indicators like poverty and social sectors like health and education are presented in detail to cover the context in terms of the development parameters aligned with the SDGs. The wide variation in state-specific contexts has been captured based on full utilization of available data and information. In this book, India's north-east, comprising of eight states, has been looked at from the perspectives of India's Act East policy, development cooperation with the neighbouring countries, promotion of trade including border trade, connectivity and economic corridors, infrastructure and industrialization. In this direction, it makes

several recommendations on drivers of economic growth and enablers of social sector development

Archive Wars Rosie Bsheer, 2020-09-22 A study of the Saudi Arabian monarchy's efforts to construct and disseminate a historical narrative to legitimize its rule. The production of history is premised on the selective erasure of certain pasts and the artifacts that stand witness to them. From the elision of archival documents to the demolition of sacred and secular spaces, each act of destruction is also an act of state building. Following the 1991 Gulf War, political elites in Saudi Arabia pursued these dual projects of historical commemoration and state formation with greater fervor to enforce their postwar vision for state, nation, and economy. Seeing Islamist movements as the leading threat to state power, they sought to de-center religion from educational, cultural, and spatial policies. With this book, Rosie Bsheer explores the increasing secularization of the postwar Saudi state and how it manifested in assembling a national archive and reordering urban space in Riyadh and Mecca. The elites' project was rife with ironies: in Riyadh, they employed world-renowned experts to fashion an imagined history, while at the same time in Mecca, they were overseeing the obliteration of a thousand-year-old topography and its replacement with commercial megaprojects. *Archive Wars* shows how the Saudi state's response to the challenges of the Gulf War served to historicize a national space, territorialize a national history, and ultimately refract both through new modes of capital accumulation. Praise for *Archive Wars*: An instant classic. With incredible insight, creativity, and courage, Rosie Bsheer peels away the political and institutional barriers that have so long mystified others seeking to understand Saudi Arabia. Bsheer tells us remarkable new things about the exercise and meaning of power in today's Saudi Arabia. Toby Jones, Rutgers University, author of *Desert Kingdom: How Oil and Water Forged Modern Saudi Arabia*. There are now two distinct eras in the writing of Saudi Arabian history: before Rosie Bsheer's *Archive Wars* and after. Robert Vitalis, University of Pennsylvania, author of *Oilcraft*. *Archive Wars* explores with conceptual brilliance and historical aplomb the various forms of historical erasure central not just to the Kingdom of Saudi Arabia but to all modern states. In a finely grained analysis, Rosie Bsheer rethinks the significance of archives, historicism, capital accumulation, and the remaking of the built environment. A must read for all historians concerned with the materiality of modern state formation. Omnia El Shakry, University of California, Davis, author of *The Great Social Laboratory: Subjects of Knowledge in Colonial and Postcolonial Egypt*.

[The Report: Saudi Arabia 2020](#) Oliver Cornock, Saudi Arabia's decision to weaken the link between hydrocarbons and economic growth and pursue a policy of diversification has seen projects across a range of sectors come to fruition in the last several years. While at present the twin crises presented by the Covid-19 pandemic and the unprecedented plunge in oil prices are

causing significant short term uncertainty the reforms that have been put in place in recent years should stand the Kingdom in good stead over the longer term
