Historical Archeology of Tourism in Yellowstone National Park Annalies Corbin, Matthew Russell, 2009-12-01 Far too often in the field of archeology the wheel of understanding and insight has a narrow focus that fails to recognize critical studies Crucial information regarding pivotal archeological investigations at a variety of sites worldwide is extremely difficult if not impossible to obtain The majority of archeological analysis and reporting at best has limited publication The majority of archeological reports are rarely seen and when published are often only in obscure or out of print journals the reports are almost as hard to find as the archeological sites themselves There is a desperate need to pull seminal archeological writings together into single issue or thematic volumes It is the intention of this series When the Land Meets the Sea to address this problem as it relates to archeological work that encompasses both terrestrial and underwater archeology on a single site or on a collection of related sites For example despite the fact that we know that bays and waterways structured historic settlement there is a lack of archeological literature that looks at both the nautical and terrestrial signatures of watersheds in influence on historic culture
