Possibility of Anthropological Fideism Da Zhi Zhong, 2004 In this book D Z Zhong establishes a methodological principle for cross cultural research called anthropological fideism While anthropologists take for granted that natives don't really believe the unintelligible or inexplicable things they say and what they say should express a deeper social meaning Zhong contends that if we have a translation manual that can interpret a foreign language and if natives are asserting honestly then what natives say still express natives belief no matter how absurd it seems His anthropological fideism entails that in fact we can and indeed we should happily live with others differences while taking them literal **The Encyclopaedic Dictionary**
