Jones, 2022-06-09 This book offers unique insights into the impact of the rise of a managerialist culture in Further Adult and Vocational Education FAVE in England It will also raise awareness of the consequences of the imposition of top down models of educational change and improvement upon the practices of educational leaders middle and senior managers and policy professionals across the FAVE sector The overall aim of this book is to understand the language policies values and approaches currently espoused in post 16 learning Often these are driven by or measured by technical rational approaches

which can have a negative impact on individuals working in the sector lead to a narrowing of the curriculum and range of assessment opportunities and do not support student progression The authors propose tentative researched and evidence based suggestions for new ways of working which might ultimately have a significant benefit to post 16 learning The book will appeal to those engaged in researching education either as academics policy makers trainees or practitioners who are interested in ways of reflecting on researching into and improving practice *UK Banks and the Lessons of the Great Financial Crisis* Adam Barber,2021-05-10 This book demonstrates the variation in the reaction of the UK s big four banks RBS Lloyds Barclays and HSBC to the Great Financial Crisis 2008 Over a decade on from the financial crisis this book asks have banks in the UK learned lessons from the crisis Bank learning in the UK after the Great Financial Crisis is something we need to know more about Whether banks are now safer and more likely to aid rather than disrupt the economy are important questions of social relevance Through a documentary analysis of Britain s big four banks in the post crisis decade 2008 2018 this book demonstrates that while some institutions have become more risk averse and display positive signs of learning others have shown little evidence of change The book uses notions of agency path dependency and structural competitive pressures to explain these inter bank variations of behaviour This book contributes to wider post crash structural debates about growth markets and regulatory reform showing how the agency of banks has played a vital role in driving the reform process *The Doctor's Handbook* Tony White,2018-04-19 Many doctors do not receive training early in their careers on the broad range of non clinical aspects of their work and confront day to day issues for which initial medical education has failed to prepare them Experienced doctors and consultants can also experience a similar lack of accessible reference material on these aspects of their role and for the non clinical training of their juniors This book and its companion volume *The Doctor s Handbook Part 1 managing your role beyond clinical medicine* have been written to address these and other needs Previously published as *The Specialist Registrar and New Consultant Handbook* these completely revised and reconfigured volumes reflect the changing everyday work of specialist trainees registrars and consultants Topics covered in Volume 2 include

The Best For My Child: Did the market really deliver? Fiona Millar,2018-05-21 Parent choice diversity of school provision and the idea of a quasi market in schools have dominated education policy for the last thirty years since the passage of the 1988 Great Education Reform Act But has the market worked in the way that was intended Are schools better Do we have a fairer school system Do parents really have choice Author and journalist Fiona Millar looks at why these policies have proved so seductive to a generation of politicians and seeks to uncover whether we really are doing the best for all our children If we are not what future reform could and should look like This is an area that has preoccupied me since the early 1990s when my own children s school was one of the first to be named and shamed by Ofsted explains Millar We had first hand experience of how the market worked in practice so this is an area I have followed with close interest every since Thirty years on from the 1988 Act I feel we are ready for a new approach but that is important to understand what worked

can mean a lifetime of poverty This report is about young people and social mobility and focuses on how to ensure that all young people are offered a high quality career path after they leave school We have found that the current policy structure means a large number of young people do not have good options and are not supported to make a choice which works for them and is successful An increasing number of young people leave school and go on to A Levels and university Of the others a small minority are at risk of dropping out of education employment or training the NEETS Successive governments have focused on these two groups for a long time But the majority of young people in the UK do not fall into either group They do not go to university they find jobs or they continue with some form of vocational education Despite making up the majority of the emerging workforce they have received much less attention It is these young people who are the focus of this report The current system for young people who do not follow an academic route is complex and incoherent with confusing incentives for young people and employers Careers advice and education are being delivered in a way which means that too many young people simply drift into further studies or their first job which often has no real prospect of progression
