

HD-A30

THE HD-A30 TAKES THE PERFORMANCE AND CONVENIENCE OF HD DVD TO THE NEXT LEVEL. For the highest level of picture quality with today's best performing high definition TVs, the HD-A30 adds 1080p output. That's twice the resolution of a 720p signal. The HD-A30 is equipped with CE-Link HDMI™-CEC connectivity. This convenient feature offers the capability to communicate with and control another HDMI-CEC compatible device in a completely new way.

1080p/24 frames per second (24p) support offers a smoother, more film-like, viewing experience. Traditionally, movie films are captured at 24 frames per second. The HD-A30 HD DVD player maintains this frame rate, allowing consumers to enjoy movies in their native frame rate.

THE TOSHIBA ADVANTAGE

High definition playback delivers 720p/1080i/1080p resolution, up to six times the resolution of DVD*. Using leading-edge efficient video compression standards makes it possible to experience the full potential of your HDTV.

Advanced audio, including Dolby® TrueHD, Dolby® Digital Plus and DTS® HD (core only), along with legacy formats including Dolby® Digital and DTS® bring an increased sonic realism to movie soundtracks.

Slim chassis cosmetic design is only 53.5 mm and features a sleek high gloss, black acrylic face plate - a perfect complement to your HD LCD television.

Backwards compatibility means you can enjoy your existing library of DVDs and CDs, and through the process of upconversion and output through HDMI, your movies are scaled to match the resolution of your HD display for near-HD picture quality.

Web-Enabled capability opens a whole new world of entertainment experiences that can include access to exciting studio-provided enhanced features.

Ethernet connection allows your HD DVD player to receive updates to support future applications and services.
