The book begins by covering literature related to general approaches and guidelines, continues with proposed methods and models for designing and instruction, and ends with instructional strategies to achieve engagement through interaction. The book is divided into four independent yet interrelated parts and a concluding section: Part I, Introduction; Part II, Best Guidelines and Standards; Part III, Best Instructional Methods and Models; Part IV, Best Engagement Strategies; and the concluding section. And finally, with words from Simonson who delineates the structure of a perfect online course.
