Natural disasters wars and conflicts epidemics and other major crises can devastate a tourism service or destination Though there is extensive literature and research on preparation and coping with tourism crises there is a gap in information on how to best market and recover from the destruction of caused to tourism businesses and destinations This book fills the gap by comprehensively examining how to rebuild the market for a tourism service or destination after a catastrophe This important book presents leading experts from around the world providing useful instruction on effective ways to plan for future crisis response and strategies for recovering business A crisis may arise from several types of destructive occurrences from natural physical destruction of important infrastructure to acts of terrorism Because of the broad range of potential problems there is no single strategy for which to deal with crises The book explores a wide range of catastrophes from Hurricane Katrina to tsunamis to war taking a detailed look at management and administrative strategies which can help stimulate tourism recovery This book explores stealth and catastrophic risks risk perceptions mediating the effects of natural disasters on travel intention and various marketing strategies designed to bring customers back This volume may become one of the most crucial resources in a tourism professional s library The book is extensively referenced and includes several tables and figures to clearly explain data This book is essential reading for tourism researchers tourism educators tourism industry managers and tourism industry administrators This book was published as a special issue of the *Journal of Travel Tourism Marketing*

*Slow Travel and Tourism* Janet Dickinson, Les Lumsdon,2010-09-23 It is widely recognized that travel and tourism can have a high environmental impact and make a major contribution to climate change It is therefore vital that ways to reduce these impacts are developed and implemented Slow travel provides such a concept drawing on ideas from the slow food movement with a concern for locality ecology and quality of life The aim of this book is to define slow travel and to discuss how some underlining values are likely to pervade new forms of sustainable development It also aims to provide insights into the travel experience these are explored in several chapters which bring new knowledge about sustainable transport tourism from across the world In order to do this the book explores the concept of slow travel and sets out its core ingredients comparing it with related frameworks such as low carbon tourism and sustainable tourism development The authors explain slow travel as holiday travel where air and car transport is rejected in favour of more environmentally benign forms of overland transport which generally take much longer and become incorporated as part of the holiday experience The book critically examines the key trends in tourism transport and recent climate change debates setting out the main issues facing tourism planners It reviews the potential for new consumption patterns as well as current business models that

facilitate hyper mobility This provides a cutting edge critique of the upstream drivers to unsustainable tourism Finally the authors illustrate their approach through a series of case studies from around the world featuring travel by train bus cycling and walking Examples are drawn from Europe Asia Australia and the Americas Cases include the Eurostar train as an alternative to air travel walking in the Appalachian Trail US the Euro Velo network of long distance cycling routes canoe tours on the Gudena River in Denmark sea kayaking in British Columbia Canada and the Oz Bus Europe to Australia
