Research Handbook on Methods and Models of Competition Law Deborah Healey, Michael Jacobs, Rhonda L. Smith, 2020-11-27 This comprehensive Handbook illuminates the objectives and economics behind competition law. It takes a global comparative approach to explore competition law and policy in a range of jurisdictions with differing political economies, legal systems and stages of development. A set of expert international contributors examine the operation and enforcement of competition law around the world in order to globalize discussions surrounding the foundational issues of this topic. In doing so, they not only reveal the range of approaches to competition law but also identify certain basic economic concepts and types of anticompetitive conduct that are at the core of competition law. *Phonological Templates in Development* Marilyn May Vihman, 2019-10-30 This book explores the role of phonological templates in early language use from the perspective of usage-based phonology and exemplar models and within the larger developmental framework of Dynamic Systems Theory. After analysing children's first words and their adult targets, Vihman sets out procedures for establishing the children's later prosodic structures and templates drawing on data from American and British English, Estonian, Finnish, French, Italian and Welsh; she also provides briefer longitudinal accounts of template use in Arabic and Brazilian Portuguese. The children are found to begin with simple word forms that match their selected adult targets; this is followed by the production of more challenging words adapted to fit the child's existing patterns. Early accuracy is replaced by later recourse to an inner model: a template of a favoured word shape. The book also examines the timing, fading, quantification and function of child phonological templates. In addition, two chapters focus on the use of templates in adult language: in the core grammar and in the more creative morphology of colloquial short forms and hypocoristics in French and Estonian and of English rhyming compounds. The idea of templates is traced back to its origins in Prosodic Morphology but its uses are most in evidence in the informal settings of adult language at play. Throughout the volume, the discussion returns to the issues of emergent systematicity, the roles of articulatory and memory challenges for children and the similarities and differences in the function of templates for adults as compared with children. **Organizing Successful Tournaments** John Byl, 2013-12-16 If you have been looking for a comprehensive collection of schedules and brackets that can be easily tailored to your events, then look no further. *Organizing Successful Tournaments* is the definitive resource that will put an end to your search. Private Enforcement of EC Competition Law Jurgen Basedow,Jürgen Basedow,2007-01-01 The European Commission s recent green paper on damages actions for breach of EC antitrust rules stirred a debate across Europe on the need for legal reform that would encourage private plaintiffs to claim compensation for losses suffered as a result of anticompetitive conduct Prominent in the wake of that initiative was the international conference convened by the Max Planck Institute for Comparative and International Private Law in Hamburg in April 2006 the papers and proceedings of which are presented in this important book Among the topics and issues raised and discussed here are the following the 2001 Courage judgment of the European Court of Justice in which the court decided that everyone who suffers losses from a violation of arts 81 or 82 EC is entitled to compensation relevance of the case law that contributes to general principles of European tort law comparative analysis from the more comprehensive experience of national laws in
