Think about how we know about past events in human history e g the expansion of the Roman Empire or the American Revolution What types of records document those events Now think about Earth s history specifically the past environmental or climatic conditions at times before recorded human history What records might there be of such conditions Make a list of your ideas n assemblage of five major types of natural archives of Earth s environmental and climatic history What common feature s do each of these paleoclimate archives share an assemblage of 5 major types of natural records or archives of Earth s environmental and climatic history Just like a diary or other historical document the layers in these natural archives contain indirect evidence i e proxies about past conditions and events recorded in a sequential order The evidence is specific to a certain time period and may be general or very detailed depending on the rate that information was recorded The faster the rate at which the recorder grew trees and corals accumulated snow and ice or was deposited sedimentary sequences the more detailed the record is and the higher its resolution For example a record in which an annual signal can observed has a very high resolution In contrast if the finest observable details are on the order of a million years then that record would have a low resolution      **Problematic Wildlife** Francesco M. Angelici,2015-12-18 This book provides insight into the instances in which wildlife species can create problems Some species trigger problems for human activities but many others need humans to save them and to continue to exist The text addresses issues faced by economists and politicians dealing with laws involving actions undertaken to resolve the problems of the interaction between humans and wildlife Here the words problematic species are used in their broadest sense as may be appreciated in the short introductions to the various sections At times the authors discuss special cases while always extending the discussion into a more general and broad vision At others they present real cutting edge analysis

of ecological topics and issues The book will be of interest to biologists ecologists and wildlife managers involved in research on wildlife parks and environmental management as well as to government departments and agencies NGOs and conservation wildlife organizations Even those in contact with nature such as hunters herders and farmers will be able to find a great deal of important information Specific case studies are selected from among the most significant and prevalent cases throughout the world A total of 26 papers have been selected for this book written by zoologists biologists and ecologists Many have an interdisciplinary approach with contributions by economists criminologists technical specialists and engineers
