Multimedia Networks Hans W. Barz,Gregory A. Bassett,2016-03-21 The transportation of multimedia over the network

requires timely and errorless transmission much more strictly than other data. This has led to special protocols and to special treatment in multimedia applications: telephony, IP TV, streaming, to overcome network issues. This book begins with an overview of the vast market combined with the user's expectations. The basic mechanisms of the audio video coding H.26x etc. are explained to understand characteristics of the generated network traffic. Further chapters treat common specialized underlying IP network functions which cope with multimedia data in conjunction with special time adaptation measures. Based on those standard functions, these chapters can treat uniformly SIP, H.248, High End IP TV, Webcast, Signage etc. A special section is devoted to home networks which challenge high end service delivery due to possibly unreliable management. The whole book treats concepts described in accessible IP based standards and which are implemented broadly. The book is aimed at graduate students/practitioners with good basic knowledge in computer networking. It provides the reader with all concepts of currently used IP technologies of how to deliver multimedia efficiently to the end user. **The**

Business of Media Distribution Jeffrey C. Ulin, 2019-05-30. In this updated edition of the industry staple, veteran media executive Jeff Ulin relates business theory and practice across key global market segments: film, television, and online digital, providing you with an insider's perspective that can't be found anywhere else. Learn how an idea moves from concept to profit and how distribution dominates the bottom line. Hollywood stars may make the headlines, but marketing and distribution are the behind-the-scenes drivers converting content into cash. The third edition includes perspectives from key industry executives at studios, networks, agencies, and online leaders including Fox, Paramount, Lucasfilm, Endeavor, Tencent, MPAA, YouTube, Amazon, and many more. Explores the explosive growth of the Chinese market, including box office trends, participation in financing Hollywood feature films, and the surge in online usage. Illustrates how online streaming leaders like Netflix, Amazon, Apple, YouTube, Hulu, and Facebook are changing the way TV content is distributed and consumed, and in cases, how these services are moving into theatrical markets. Analyzes online influences and disruption throughout the distribution chain and explains the risks and impact stemming from changing access points, e.g., stand-alone apps, delivery methods over the top, and consumption patterns, e.g., binge watching. Breaks down historical film windows, the economic drivers behind them, and how online and digital delivery applications are changing the landscape. Ulin provides the virtual apprenticeship you need to demystify and manage the complicated media markets, understand how digital distribution has impacted the ecosystem, and glimpse into the future of how film and television content will be financed, distributed, and watched. An online eResource contains further discussion on topics presented in the book. **FCC Record** United States.
