Publishing Company,1994-04 Drawing on an incomparable collection of architectural drawings and prints photographs books and periodicals Architecture and Its Image explores the idea of serial imageryin architectural representation through works dating from the Renaissance to today Although drawingsand photographs of architecture are often viewed as single images

they are generally produced in series. The most basic of these is the set of drawings that shows a building in plan, elevation and section. But as *Architecture and Its Image* reveals, the concept can be extended to other types of architectural representations: theater sets, travel accounts, photographic surveys, pattern books, even the alternative designs submitted for competition. All relate in different ways to their subjects; viewed in series, all reveal underlying principles of organization that can convey new understanding of architectural imagery. Under the headings *Architecture in Three Dimensions*, *Architecture in Place and Time*, and *Architecture in Process*, essays by six scholars use the concept of serial imagery to explore the complex relationship between various types of architectural representations and their subject matter: projective drawings, Robin Evans' 19th-century urban survey photography, Eve Blau's travel narratives of English architectural explorers from the mid-18th to the mid-19th century, Edward Kaufman's festival and theater architecture, William Alexander McClung's architectural publications, competitions, and exhibitions, Helene Lipstadt and computer graphics, Robert Bruegmann. An accompanying catalog describes 350 examples drawn from the CCA collections of work by architects and architectural delineators, photographers, and cartographers. The book is illustrated by over 400 superbly reproduced duotone illustrations and 16 pages of color. Eve Blau is Curator of Exhibitions and Publications at the CCA. Edward Kaufman is Assistant Professor in the School of Architecture at Columbia University. *Architecture and Its Image* is a publication of the Centre Canadien d'Architecture / Canadian Centre for Architecture, Montreal.
