ICEL 2018 13th International Conference on e-Learning Professor Eunice Ivala, 2018-07-05

University on the Border Lis Lange, Vasu Reddy, Siseko H. Kumalo, 2021-08-27 The volume explores and thinks through the process of decolonising the South African higher education system by examining MustFall The text offers theoretical insights from a historical contemporary and multidisciplinary lens while examining the embedded meanings of the university as an institution idea and set of practices to show the shifts and changes that were inaugurated by MustFall along with the historicities that define the university both locally and globally The retro and prospective insights presented in

the book surface the crisis of authority that places the university in a state of precarity which is framed in the book as the border The volume proposes the concept of the border recognising its conceptual and analytical dynamism as a generative space that can facilitate new imaginaries and articulations of this social institution the university

Negotiating Quality Concerns in Higher Education amidst Disruptions Felix Maringe, Otilia Chiramba, 2025-06-02 Quality is at the heart of organisational development It is the one single reason organisations make progress or fail dismally when it is absent Disruptions can both be a catalyst for innovation and progress on one hand but when they are not well handled they can cause organisations to spiral into catastrophe and oblivion This book is about how best to safeguard quality both during and beyond disruptions Based largely on research in South Africa the collection of essays will resonate with multiple higher education contexts and audiences Collectively the essays provide compelling reading for practitioners academics researchers and policy makers in higher education The book's central message is that while disruptions can expose our organisational weaknesses they create several opportunities to drive change and transformation The essays here capture the transition from crisis to high performance and ways in which universities can navigate such journeys

Transforming Universities in South Africa, 2020-08-31 The idea of transformation in higher education underpins all policy documents academic literature and on going debates in South Africa Transforming Universities in South Africa Pathways to Higher Education Reform responds to the pressing need to comprehensively review the post apartheid experience and assess where South Africa's higher education stands across the continent and globally particularly within the country's efforts to overcome decades of socio economic imbalances It addresses the question of whether South Africa's transformation strategy from apartheid to democracy was simply a symbolic new flag raising and new anthem singing exercise reflecting a transition akin to those limited decolonization projects elsewhere in the world or whether something more fundamental was possible and was achieved with political and policy implications for other countries in Africa and globally This volume's ultimate purpose is to provide a basis for imagining new futures in which South Africa higher education in the context of Africa and the global world takes centre stage

Tourism and Hospitality for Sustainable Development Emmanuel Ndhlovu, Kaitano Dube, Catherine Muyama

Kifworo, 2024-08-27 The tourism and hospitality industry is rapidly undergoing a disruptive transformation owing to advances in information and communications technology. This book aims to highlight how the unfolding digital transformation trends help the industry attain sustainable development by taking full account of its current and future economic, social and environmental impacts and addressing the needs of tourists, the industry, the environment and destinations. With the advent of digital technologies following the Fourth Industrial Revolution (4IR), there has been a rapid change in how customers and businesses interact regarding the timeliness and relevance of communication. Although the positive effects of digital transformation have received sustained scholarly interest, its adverse effects as well as how the digitisation of tourism operations can enable the achievement of sustainable development have attracted limited academic focus. The book comprises contributions that generate theoretical insights, empirical findings and evidence-based recommendations by focusing on emerging and forecasted technologies used in the tourism and hospitality industry such as blockchains, robots, Artificial Intelligence, Virtual Reality, big data and analytics. The book could be helpful for future research to focus on the impact of different forms of digital technology by examining their sociocultural and environmental effects. Building on prior research, the chapters in this volume extrapolate current studies on digital development to provide more links to tourism and hospitality.

Sustainable Development Goals for Society Vol. 2 Godwell Nhamo, David Chikodzi, Kaitano Dube, 2021-06-26

This book profiles various cases that are emerging in addressing global challenges in the context of SDGs for society in the era of climate change and covers case studies of projects being undertaken to tackle biodiversity, food security, climate change, energy and water security. The book is written by 37 authors and will appeal to various stakeholders including academics working within the identified thematic areas, policy planners, development agencies, governments and United Nations agencies. The adoption of the Sustainable Development Goals (SDGs) in 2015 ushered a new era in the global development agenda as the world transitioned from the Millennium Development Goals (MDGs). The new era of SDGs that are all inclusive, unlike the MDGs, with the focus now being on ensuring human success that is predicated on environmental protection. The year 2020 marked five years post the adoption of the SDGs with increased calls for stock-taking of progress made amid strong calls for a decade of action to accelerate the delivery of the SDGs by 2030. These calls have been louder now given the impact of the COVID-19 pandemic which reset the global economy and increased intensity of extreme weather events across the world. Since climate change has emerged as one of the biggest threats to the achievement of the SDGs, there has been growing concerns on its impact on biodiversity loss and the extinction of some species. There are also concerns regarding increased food insecurity at the household level in some parts of the world, particularly in Asia and Africa. With the demand for climate change action on the increase, there have also been growing calls for the big carbon emitters to

drastically cut their emissions and invest in clean energy to save the planet by following development pathways making emissions stay under the 1.5°C increase in temperature
