

VPL-FE40

SXGA+, 4,000 Lumens Installation Projector with BrightEra technology for higher quality pictures and increased reliability

Take the beauty and brawn of the VPL-FX40 and turbo charge it and you have the VPL-FE40, Sony's new SXGA+ (1400 x 1050) resolution projector.

Delivering an extremely bright 4,000 ANSI lumens at SXGA+ Resolution and featuring a unique, new angular design body, the VPL-FE40 is an excellent projector for detailed high-impact multimedia presentations in almost any venue.

The VPL-FE40 Installation Projector is one of the first to incorporate our new BrightEra Inorganic alignment layer 0.79-inch LCD Panels manufactured by the Sony Panel Group.

BrightEra High Temperature Polysilicon (HTPS) LCD panels represent the very latest technology in precise liquid crystal alignment, offering increased reliability and higher picture quality. In comparison to conventional LCD panels, BrightEra technology greatly augments the panel's resistance to ultraviolet light, which is a key factor in panel reliability. In addition, an increase to the aperture ratio from traditional panels enables the projectors to produce an incredibly bright image, while avoiding colour separation or the "rainbow effect" of the final image that can affect some other projection technologies.

The VPL-FE40 offers SXGA+ resolution to project clear and crisp images even on large screens up to 600 inches (measured diagonally). With its outstanding functionality, simple operation and network capabilities, the VPL-FE40 projector provides you with the tools to perform seamless presentations.

The projector's ability to accept a broad array of signals, including those from sources equipped with the latest High-Definition Multimedia Interface (HDMI),

gives you a wider choice of content so as to increase the dynamics of your presentations.

Also available: VPL-FE40L lens-less version offers a choice of 3 bayonet lenses to meet the requirements of your specific applications.

This product comes with PrimeSupport – fast, hassle-free repairs and a helpline offering expert technical advice. Which gives you the peace of mind that Sony is looking after your equipment, and your business.

Features

*Networking Presentations

When the VPL-FE40 projector is installed on a LAN via RJ45, presentations can be projected from any PC on that network – whether connected via a LAN cable or wirelessly.

“New feature” High-Speed Image Transfer over IP Networks: Because the VPL-FE40 projector employs efficient compression and transmission techniques, they can receive and project images via IP networks for effective presentations from any networked PC.

Monitor Out

The VPL-FE40 projector can display the image simultaneously on a large screen and on an additional monitor (via a 15-pin D Sub connection), so that the user can face the audience and still see the information being shown.

Low Fan Noise

For an undisturbed presentation, quiet operation is very important. The noise level of the VPL-FE40 is 28dB in low mode which is considered less than a whisper.

RS-232C

Connections include an RS-232C port for control of the projector.

Password Protection

When this function is activated a password is required to use the projector (if the password is lost, Sony is able to retrieve it).
