World Class Manufacturing: The Next Decade Richard J. Schonberger,2010-05-11 Since the invention of double entry bookkeeping managers have judged a company s worth by sales and profits Now Richard J Schonberger the architect of the worldwide Just In Time revolution reaches beyond financials to redefine excellence and reveals with new benchmark data how pioneers become dynasties Schonberger s pathbreaking new research reveals that from 1950 to 1995 while financials dipped and soared repeatedly industrial decline and ascendancy correlated perfectly with inventory turnover one of two key nonfinancial indicators and a bedrock measure along with customer satisfaction of a company s power strength and value In this immensely readable book he captures these new metrics the true predictions of future success in 16 customer focused principles created from self scored reports supplied by over 100 pioneering manufacturers in nine countries Armed with new world class benchmark data Schonberger redefines excellence in terms of competence capability and customer focused employee driven data based performance For front line associates to senior executives Schonberger has written manufacturing s action agenda for the next decade This book will be indispensable reading for manufacturing and general managers in all industries as well as for pension fund managers institutional investors stock analysts and stockbrokers

[Reshore Production Now](#) William A. Levinson,2023-06-08 This book addresses the vital importance of reshoring US manufacturing capability to ensure economic and military security and then discusses the proven methods that the United States used to gain manufacturing supremacy in the first place The vital takeaway is If the job can be made sufficiently productive the per unit labor cost ceases to be relevant which means a business can pay high wages realize high profits and deliver low prices simultaneously The contest is then not between high wages and cheap labor but between efficiency and inefficiency and when automation is involved machine against machine Readers will be able to put these principles to work very quickly to achieve tangible results The relatively low Federal minimum wage has meanwhile become a major issue but inflation skyrocketed in the second quarter of 2022 when higher wages and higher demand for goods and services were not matched with higher productivity The book addresses the relationship between the money supply and the velocity of money to prices wages and productivity A manufacturing resurgence in the United States will not only increase our standard of living enormously but generate taxable economic activity that will help pay down rather than increase the Federal debt Higher productivity also delivers a greater supply of goods to accompany higher wages and thus works against inflation This can prevent looming recessions and disruptions

Theories, Methods and Numerical Technology of Sheet Metal Cold and Hot Forming Ping Hu,Ning Ma,Li-zhong

Liu,Yi-guo Zhu,2012-07-23 Over the last 15 years the application of innovative steel concepts in the automotive industry has increased steadily Numerical simulation technology of hot forming of high strength steel allows engineers to modify the formability of hot forming steel metals and to optimize die design schemes Theories Methods and Numerical Technology of Sheet Metal Cold and Hot Forming focuses on hot and cold forming theories numerical methods relative simulation and experiment techniques for high strength steel forming and die design in the automobile industry Theories Methods and Numerical Technology of Sheet Metal Cold and Hot Forming introduces the general theories of cold forming then expands upon advanced hot forming theories and simulation methods including the forming process constitutive equations hot boundary constraint treatment and hot forming equipment and experiments Various calculation methods of cold and hot forming based on the authors experience in commercial CAE software for sheet metal forming are provided as well as a discussion of key issues such as hot formability with quenching process die design and cooling channel design in die and formability experiments Theories Methods and Numerical Technology of Sheet Metal Cold and Hot Forming will enable readers to develop an advanced knowledge of hot forming as well as to apply hot forming theories calculation methods and key techniques to direct their die design It is therefore a useful reference for students and researchers as well as automotive engineers

promising technologies inequalities in healthcare persist Life and illness play out in the gap between visualized bodies and ideological notions of health and disease This publication brings together perspectives from art history visual science studies science and technology studies sociology and cultural anthropology to encounter watercolours sculpture comics advertising and infographics Images are a primary way of recognizing the body but they inevitably promise too much and disappoint us in our quest for bodily self control The collection brings together epistemology medicine and art to understand what biomedicine looks like and how we might view it differently in the past and in the future

Gringolandia Matthew Hayes, 2018-11-13 A telling look at today's reverse migration of white middle class expats from north to south through the lens of one South American city Even as the migration crisis from the Global South to the Global North rages on another lower key and yet important migration has been gathering pace in recent years that of mostly white middle class people moving in the opposite direction Gringolandia is that rare book to consider this phenomenon in all its complexity Matthew Hayes focuses on North Americans relocating to Cuenca Ecuador the country's third largest city and a UNESCO World Heritage Site Many began relocating there after the 2008 economic crisis Most are self-professed economic refugees who sought offshore retirement affordable medical care and/or a lower cost location Others however sought adventure marked by relocation to an unfamiliar cultural environment and to experience personal growth through travel illustrative of contemporary cultures of aging These life projects are often motivated by a desire to escape economic and political conditions in North America Regardless of their individual motivations Hayes argues such North-South migrants remain embedded in unequal and unfair global social relations He explores the repercussions on the host country from rising prices for land and rent to the reproduction of colonial patterns of domination and subordination In Ecuador heritage preservation and tourism development reflect the interests and culture of European descendent landowning elites who have most to benefit from the new North-South migration In the process they participate in transnational gentrification that marginalizes popular traditions and nonwhite mestizo and indigenous informal workers The contrast between the migration experiences of North Americans in Ecuador and those of Ecuadorians or others from such regions of the Global South in North America and Europe demonstrates that in fact what we face is not so much a global migration crisis but a crisis of global social justice
