Deanship in the Global South Oliver J.J. Seale,2021-02-08 The university today is a postmodern neo liberal competitive boundary less knowledge conglomerate a far cry from its historical traditional classical and collegial roots There is a body of literature on deanship that points to its evolving nature in the contemporary academe characterised by complexity and change Balancing academic demands simultaneously with the requirements for effective performance leadership and management lies at the heart of this very challenging bridging role nowadays Deans are generally former academics emerging from a traditional collegial space and often catapulted into the relatively unknown domain of executive management with its related problems Deans nowadays are required to be more than collegial intellectual leaders They are also meant to be fiscal and human resource experts fundraisers politicians and diplomats Deanship in the Global South Bridging Troubled Waters is about the deans lived reality as they try to balance the demands of both the academe from which they emerge and the administration to whom they now need to account Their lack of preparation and inadequate support points to the need for a more strategic integrated approach to leadership development within their critical bridging roles between the academe and administration

Corrupted Jonathan D Jansen,2023-02-01 In South African higher education the images of dysfunction are everywhere Student protests Violence Police presence Rubber or real bullets Class disruptions Burning tyres Damaged buildings Injury and sometimes death Reports of wholesale corruption Year after year often in the same set of universities the problem of routine instability seems insoluble The financial academic and reputational costs of ongoing dysfunction are high especially for those universities caught up in the never ending struggle to overcome apartheid legacies Any number of explanations have been ventured including a lack of resources shortage of capacity rural location corrupt officials and endemic conflict Corrupted takes a deeper look at dysfunction in an attempt to unravel the root causes in a sample of South African universities At the heart of the problem lies the vexed issue of resources or more pertinently the relationship between resources and power who gets what and why Whatever else it aspires to be commonly a place of teaching learning research and public duty a university in an impoverished community is also a rich concentration of resources around which corrupt staff students and those outside of campus all vie for access Taking a political economic approach Jonathan Jansen describes the daily struggle for institutional resources and offers accessible sensible insights He argues that the problem won t be solved through investments in capacity building alone because the combination of institutional capacity and institutional integrity contributes to serial instability in universities Rather durable solutions would include the depoliticisation of university councils and appointments of academics with integrity and capacity to manage and lead these fragile institutions This groundbreaking and long overdue study will offer a promising way forward for universities to better serve their communities and the country more broadly

The History of Geophysics in Southern Africa Johan

de Beer,2016-01-25 Geophysics is a comparatively young science which only evolved as a distinct discipline during the 19th century However its phenomena like earthquakes tsunamis volcanic eruptions and lightning had been objects of fear curiosity and speculation since ancient times In this book Johan de Beer and his research team reveal that geophysical activity in South Africa can be traced back to as early as 1488 This is a truly astonishing revelation which deserves to be firmly entrenched as part of the country s proud history The book also discusses the history and formation of South African geophysical institutions that made a huge and seldom acknowledged contribution to the technological development of southern Africa **Privatization, Vulnerability, and Social Responsibility** Martha Albertson Fineman,Titti

Mattsson,Ulrika Andersson,2016-11-25 Cover Title Copyright CONTENTS 1 Introduction PART I Analyzing privatization 2 Three faces of privatization 3 Big government against social responsibility A vulnerability critique of privatization s public priorities 4 Rethinking responsibility in private law 5 In the land of choice Privatized reality and contractual vulnerability PART II Privatization and corporatization 6 Entrepreneurial subjectivity the privatization of risk and the ethics of vulnerability **Agronomic Crops** Mirza Hasanuzzaman,2019-11-23 Agronomic crops have provided food beverages fodder fuel medicine and industrial raw materials since the beginning of human civilization More recently agronomic crops have been cultivated using scientific rather than traditional methods However in the current era of climate change agronomic crops are suffering from different environmental stresses that result in substantial yield loss To meet the food demands of the ever increasing global population new technologies and management practices are being adopted to boost yields and maintain productivity under both normal and adverse conditions Further in the context of sustainable agronomic crop production scientists are adopting new approaches such as varietal development soil management nutrient and water management and pest management Researchers have also made remarkable advances in developing stress tolerance in crops However the search for appropriate solutions for optimal production to meet the increasing food demand is still ongoing Although there are several publications on the recent advances in these areas there are few comprehensive resources available covering all of the recent topics This timely book examines all aspects of production technologies management practices and stress tolerance of agronomic crops The Education Gazette of the Province of the Cape of Good Hope Cape

of Good Hope (South Africa). Education Department,1924 **Historical Dictionary of South Africa** Christopher Saunders,Peter Limb,2020-12-15 As the most influential and powerful country on the entire continent of Africa an understanding of South Africa s past and its present trends is crucial in appreciating where South Africans are going to and from where they have come South Africa changed dramatically in 1994 when apartheid was dismantled and it became a democratic state Since 2000 when the previous edition appeared further big changes occurred with the rise of new political leaders and of a new black middle class There were also serious problems in governance in public health and the economy but with a remarkable popular resilience too This third edition of Historical Dictionary of South Africa contains a chronology

an introduction and an extensive bibliography The dictionary section has more than 600 cross referenced entries on important personalities as well as aspects of the country s politics economy foreign relations religion and culture This book is an excellent resource for students researchers and anyone wanting to know more about South Africa
