Recovery of Values from Low-Grade

and Complex Minerals Elvis Fosso-Kankeu, Bhekile B. Mamba, Antoine F. Mulaba-Bafubandi, 2024-04-24 Recovery of Values from Low Grade and Complex Minerals The book elaborates on various physicochemical properties of minerals and technological developments to improve the recovery of metals while ensuring cost effectiveness and minimal environmental impact The mineral industry is undergoing significant cultural organizational and technological transformations to address some of the major limitations and challenges related to the environmental and productivity domains As far as productivity is concerned the decrease of high grade ores has been one of the stumbling blocks toward the achievement of maximum recovery of metals while on the other hand the complexity of minerals therein makes it difficult to profitably extract metals using only conventional methods This book presents eight specialized chapters that focus on the exploration of the complexity of minerals that are likely to negatively influence the recovery of values as well as the development of adequate technologies capable of improving the process of mineral concentration and or metal recovery from complex minerals in a sustainable manner It reviews the various physicochemical properties of minerals that are likely to pose a challenge during the attempt to recover values using conventional methods It also elaborates on the recent technological development that has been considered by researchers to improve the recovery of metals from gangue dominated minerals while ensuring cost effectiveness and minimal adverse environmental impact Audience This book will be of interest to academic researchers from the fields of mineral processing hydrometallurgy geochemistry environment chemistry engineering and professionals including mining plant operators environmental managers in the industries government regulatory bodies officers and environmentalists

A composite index of quality of life for the Gauteng city-region: a principal component analysis approach Talita Greyling, The improvement of the quality of life of all South Africans is high on the agenda at national The National Planning Commission 2012 and regional levels of government The Gauteng Planning Commission 2012 and it is therefore important to develop an instrument that can measure this multi dimensional concept The need therefore exists for a composite index of quality of life with the ability to both track the quality of life of people over time and compare it across different demographic and socio economic groups Such a measure could identify those demographic and socio economic groups with low levels of quality of life and also highlight dimensions that need to be prioritised in order to improve the wellbeing of people In South Africa there are a limited number of quality of life indices and measures of wellbeing Indices that measure wellbeing nationally include the Quality of Life Index of Moller and Schlemmer 1983 the Living Standard Measure LSM Index produced by the South African Audience Research Foundation SAARF 2013 the South African Development Index of the South African Institute of Race Relations 2011 and the Everyday Quality of Life Index Higgs 2007 The following indices measure wellbeing at a regional level the Quality of Metropolitan City Life in South Africa Index Naude et al 2009 the Non Economic Quality of Life Index at Sub National Levels Rossouw Naude 2008 and the Quality of Life Index of the Gauteng City Region Observatory GCRO 2011 Although these

quality of life indices make distinctive contributions to the study field the focus of these studies is often to measure only objective or subjective quality of life or only economic or non economic quality of life rather than all of the above Furthermore many of the indices use equal weighting which does not necessarily reflect the priorities of the communities

Software Engineering Research in System Science Radek Silhavy,Petr Silhavy,2023-07-08 The latest advancements in software engineering are featured in this book which contains the refereed proceedings of the part of the 12th Computer Science Online Conference 2023 CSOC 2023 held online in April 2023 The software engineering research in system science session is focusing on the importance of software engineering in the field of system science This section provides a platform for researchers to share their insights on modern research methodologies machine learning and statistical learning techniques in software engineering research The session provides a unique opportunity for researchers and industry experts to explore the latest trends in software engineering and inspire future research directions This session brings together experts from different fields to present their research and discuss the latest challenges and opportunities One of the key themes of this session is the application of artificial intelligence in software engineering Researchers are exploring how techniques can be used to automate various aspects of software engineering such as testing debugging and maintenance This helps improve the quality and efficiency of software development processes Bioelectronics Anuj Kumar,Ram K. Gupta,2022-12-08 Bioelectronics is emerging as a new area of research where electronics can selectively detect record and monitor physiological signals This is a rapidly expanding area of medical research that relies heavily on multidisciplinary technology development and cutting edge research in chemical biological engineering and physical science This book provides extensive information on the i fundamental concepts of bioelectronics ii materials for the developments of bioelectronics such as implantable electronics self powered devices bioelectronic sensors flexible bioelectronics etc and iii an overview of the trends and gathering of the latest bioelectronic progress This book will broaden our knowledge about newer technologies and processes used in bioelectronics **Geochemistry** Dionisios Panagiotaras,2012-05-02 This book brings together the knowledge from a variety of topics within the field of geochemistry The audience for this book consists of a multitude of scientists such as physicists geologists technologists petroleum engineers volcanologists geochemists and government agencies The topics represented facilitate as establishing a starting point for new ideas and further contributions An effective management of geological and environmental issues requires the understanding of recent research in minerals soil ores rocks water sediments The use of geostatistical and geochemical methods relies heavily on the extraction of this book The research presented was carried out by experts and is therefore highly recommended to scientists under and post graduate students who want to gain knowledge about the recent developments in geochemistry and benefit from an enhanced understanding of the dynamics of the earth s system processes *Engineers in a Developing Country* Rènnette Du Toit,Joan Roodt,2009 The study provides a demographic analysis of employment trends across the public and private sectors

of the economy and investigates the demand for engineers technologists and technicians in the workforce A comprehensive analysis of the educational context for engineering professionals focuses on enrolment graduation and throughput trends in all engineering disciplines at universities and universities of technology and reveals that although there have been positive innovations in education and training strategies in recent years many issues especially at secondary school level remain a challenge Women in engineering is a particular focus of this study which devotes a chapter to examining the factors that influence their choice of career the barriers they experience in the labour market and strategies for encouraging women into the profession This comprehensive monograph offers valuable quantitative and qualitative information about engineering capacity across all engineering disciplines in South Africa It is therefore an important reference for all engineering academics as well as decision makers in both the private and public sectors and will be useful to aspiring and current engineering students whatever their field

Proceedings of the 21st International Symposium on High Voltage Engineering Bálint Németh, 2019-10-31 High voltage engineering is extremely important for the reliable design safe manufacture and operation of electric devices equipment and electric power systems The 21st International Symposium on High Voltage Engineering organized by the 90 years old Budapest School of High Voltage Engineering provides an excellent forum to present results advances and discussions among engineers researchers and scientists and share ideas knowledge and expertise on high voltage engineering The proceedings of the conference presents the state of the art technology of the field The content is simultaneously aiming to help practicing engineers to be able to implement based on the papers and researchers to link and further develop ideas

Structuring Mass Higher Education David Palfreyman, Ted Tapper, 2012-10-12 Undoubtedly the most important development in higher education in recent years has been the seemingly inexorable expansion of national systems In a comparatively short time period many countries have moved from an elite to a mass model Furthermore expansion has invariably changed the whole experience of higher education for all the interested parties from presidents rectors and vice chancellors to first term undergraduates Structuring Mass Higher Education examines the impact of this change upon the existing national structures of higher education It also defines and highlights what makes an elite university something which institutions must strive for in order to gain their position as global players With case studies and contributions from a wide

range of international authors the book explores questions such as Do higher education institutions retain a national significance even though the vestiges of an international reputation have long faded Has expansion undermined the quality of higher education because governments sought to expand on the cheap Is the elite institutional response to mass higher education perceived as a threat to be responded to with purposeful action that sustains their elite status Does the emergence of the international league tables pose a challenge to those responsible for governing elite institutions These are critical issues with which both policy makers and institutional leaders will have to grapple over the next ten years making Structuring Mass Higher Education a timely relevant and much needed text It will appeal to policy makers and practitioners within higher education as well as student and scholars worldwide
