Handbook of Development Economics Dani Rodrick, M.R. Rosenzweig, 2009-11-09 What guidance does academic research really provide to economic policy development The critical and analytical surveys in this volume investigate links between policies and outcomes by surveying work from broad macroeconomic policies to interventions in microfinance Asserting that there are no universal correspondences between policies and outcomes contributors demonstrate instead that only an intense familiarity with the development context and the universe of applicable economic models can generate successful policies Getting cause and effect right is essential for policy design and implementation With the goal of drawing researchers and policy makers closer this volume highlights our increasing understanding of ways to combine economic theorizing with careful thoughtful empirical work Presents an accurate self contained survey of the current state of the field Summarizes the most recent discussions and elucidates new developments Although original material is also included the main aim is the provision of comprehensive and accessible surveys **Land Economics**, 1948 *Alternative*
