Selwood,A. Fung,Christopher D. O'Mahoney,2012-12-06 At two previous conferences of Working Group 3 7 the evaluation of the implementation of computerised school information systems SISs in Hong Kong and The Netherlands were presented Here we will present the results of similar research in England The rationale for these studies was to fill the gap in our knowledge on this important type of computer use in schools and by that to gain insight into the factors that prove to promote successful SIS implementation In England SIMS School Information Management System has the largest market share of computerised

school administration systems SIMS is a modular but integrated system in that once entered data is available between modules Briefly SIMS consists of about twenty modules that support the work of clerical staff and school managers and teachers for details see Wild The user opinion on the quality of SIMS The nature and effects of the implementation process and the characteristics of the schools into which SIMS was introduced Factors affecting the degree of SIMS use The variables relating to the above issues that were investigated in this study fell into five distinct categories according to Visscher s model see Figure 1 i e features of SIMS use the implementation process school organisation and the intended/unintended effects The study assumed possible interrelationships between all these variable groups Usability Evaluation and Interface Design Michael J. Smith, Richard John Koubek, Gavriel Salvendy, Don Harris, 2001-08-01 This three volume set provides the complete proceedings of the Ninth International Conference on Human Computer Interaction held August 2001 in New Orleans A total of 2 738 individuals from industry academia research institutes and governmental agencies from 37 countries submitted their work for presentation at the conference The papers address the latest research and application in the human aspects of design and use of computing systems Those accepted for presentation thoroughly cover the entire field of human computer interaction including the cognitive social ergonomic and health aspects of work with computers The papers also address major advances in knowledge and effective use of computers in a variety of diversified application areas including offices financial institutions manufacturing electronic publishing construction and health care **Contemporary Systems Analysis and Design** Raymond Thomas Clarke, Charles A.
