will provide readers with a comprehensive description of the most popular management improvement programs and their primary applications to their organizations We will discuss the philosophy and principles of these programs and include a discussion on how to use each program to achieve optimum success A central theme of this book is to not just adopt an improvement program for the sake of adopting it but to match the improvement program with the specific needs in an organization In the chapters that follow we will illustrate how this matching process can be conducted Above all we plan the book to be a concise and useful resource to both practitioners and academics Here is what you can expect in the chapters
