The Use of Pop Songs in the EFL Classroom Ornerová Lenka,2011-03-09 Inhaltsangabe Introduction I have chosen the topic of using pop songs in the EFL classroom because I strongly believe that working with pop songs is a highly motivational device When I was a student at a lower and upper secondary school listening to songs in English classes was my favourite activity I have always wanted to be able to understand the lyrics of songs I listened to Later I realized that I have learned a lot from listening to pop songs and analyzing their lyrics Therefore in my diploma project I would like to prove that using pop songs is a highly motivational device in teaching English with instructional value and that students enjoy working with pop songs The theoretical part of this diploma project is based on relevant sources of background literature In the first two chapters the use of songs is described with regard to motivation and the Multiple Intelligences Theory The third and fourth chapter deal with the reasons for using songs and their classification In the last two chapters of the theoretical part pedagogical principles of using pop songs in class as well as the pros and cons of teaching through pop songs are presented The practical part is based on the findings of three surveys I have conducted in the field of using songs in the EFL classroom In the first part of the research I present an analysis of questionnaires which I distributed among English teachers at lower and upper secondary schools and grammar schools In the second part of the research I describe students attitudes to pop song based lessons which I taught during my teaching practice at grammar schools In the third part of the research I analyze the types of songs presented in commonly used textbooks at lower and upper secondary schools In addition I present a self developed teaching

material containing a list of pop songs suitable for the EFL classroom In the last part of the practical part I answer the research questions and provide some implications for my own teaching Inhaltsverzeichnis Table of Contents

Theories and Recent Approaches will aim to present the process of learning an additional language apart from one's native language. The process of understanding writing and speaking another language with fluency involves complex intellectual and emotional responses as well as continuous information processing abilities. A variety of perspectives is needed in order for learning to take place. Many factors both internal and external are involved in determining why some learn a second language at a faster rate than others. With an internal or external focus of attention, various linguistic techniques have explored the basic questions about SLA. With the ability to convey and structure information in a second language, there is a need for what is being learned to be viewed from various perspectives. The focus on continuous natural UG capability for language learning versus communicative processing requirements differs among viewpoints on how SLA develops. This book intends to provide readers with language acquisition, language comprehension, language development, language processing, and psychological and social variables which have been largely excluded by purely language approaches.
