**Learning in the 21st Century** Young Hoan Cho,Imelda S. Caleon,Manu Kapur,2015-08-12 With the rapid changes in the

social political economic and technological landscape around the world today's learners face a more globally competitive job market after leaving school. The 21st century, which is characterized by the emergence of knowledge-based societies, expects learners to be comfortable in dealing with ambiguities and complexities in the real world and to be able to use knowledge as a tool at their workplace. This book will help readers develop an in-depth understanding of authentic problem solving and learning and how it can be used to make a difference in their school or learning communities for the development of 21st century competencies. Comprising 20 chapters written by Singapore-based and international authors, the book is organized into three themes: authentic problems, authentic practices, and authentic participation. It details innovative school practices, e.g., productive failure concerning the design of problems, learning activities, learning environments, and ICT tools for authentic problem solving and learning. Along with theoretical explanations of authentic learning processes and outcomes, the book also elucidates how students learn by generating and exploring solutions to complex problems and which cognitive functions are needed at different stages of problem-based learning. Presenting coherent descriptions of instructional design principles, successful cases, and challenges encountered in K-12 schools and learning communities, the book provides useful information, new insights, and practical guidance for school directors, parents, teachers, and researchers seeking to develop authentic learning environments for 21st century learners.

**Urban Education for the 21st Century** Festus E. Obiakor, Floyd D. Beachum, 2005. This timely book exposes the complexities and realities facing urban schools that are inadequately funded and denigrated, along with students who continue to be misidentified, misassessed, miscategorized, misplaced, and misinstructed by ill-prepared and unprepared educators and service providers. The text very successfully demonstrates the comprehensive nature and connectedness of problems and prospects in urban education. This book will be an added resource to researchers, scholars, educators, and service providers. It should be an excellent required text for graduate and undergraduate courses in all branches of education. Additionally, the book will be of interest to education administrators at all levels, public school teachers, policy makers, and change agents. The thirteen chapters discuss and explore the following primary topics: Urban education and the quest for democracy, equity, and excellence; Educating urban learners with and without special needs; Personnel preparation and urban schools; Teaching and learning in urban schools; Educational leadership in urban schools; Insights into educational psychology and what urban practitioners must know; Managing violence in urban schools; Financing urban schools; Reducing the power of whiteness in urban schools; Promises and challenges of building and the future perspectives of urban education.

The Handbook of Educational Theories Beverly Irby, Genevieve H. Brown, Rafael Lara-Alecio, Dr. Shirley A. Jackson, 2013-03-01. Although educational theories are presented in a variety of textbooks and in some discipline-specific handbooks and encyclopedias, no publication exists which serves as a comprehensive consolidated collection of the most

influential and most frequently quoted and consulted theories There is a need to put such theories into a single easily accessible volume A unique feature of the Handbook is the way in which it conveys the theories The organization of the chapters within each section makes the volume an easy to use and understandable reference tool as researchers and practitioners seek theories to guide their research and practice and as they develop theoretical frameworks In addition to the traditional theories presented the Handbook includes emerging theories for the 21st Century as well as presenting practical examples of the use of these theories in research from dissertations and published articles An appendix which indicates which theories have instruments associated with them and where those instruments can be found is also included The Handbook consists of 12 sections Section I provides the introduction with a focus on what constitutes good theory as well as how theory guides research and practice The remaining sections address Philosophical Educational Constructs Learning Theory Instructional Theory Curriculum theory Literacy and Language Acquisition Theory Counseling Theory Moral Development Theory Classroom Management Theory Assessment Theory Organizational Theory and Leadership Management Theory Each section consists of an overview written by the section editor of the general theoretical concepts to be addressed by the chapter authors Each chapter within the section will include a a description of the theory with goals assumptions and aspects particular to the theory b the original development of and interactions of the theory c validation of the theory d generalizability of the theory across cultures ethnicities and genders e the use and application of the theory f critiques of the theory g any instruments associated with the theory and h two to five particular studies exemplifying particular theories as individuals have used them in theoretical framework of dissertations or published articles and be written by the original theorist or prominent contributors to the theory The Handbook is intended for graduate students enrolled in research courses or completing theses and dissertations Additionally professors of all educational disciplines in the social sciences would be an interested audience There is also potential use of the text as administrators counselors and teachers in schools use theory to guide practice As more inquiry is being promoted among school leaders this book has more meaning for practitioners
