Takreer Safety Manual:

Managing Occupational Health and Safety Risks in High-hazard Industries: A Technical Business Guide Marcell Greeff, 2023-06-30 Despite significant advancements made over the past century the occurrence of serious injuries work related fatalities and property loss remains a persistent global challenge in various high hazard industries The implementation of suitable risk management frameworks plays a vital role in mitigating risks to employees facilities and the surrounding environment This book draws upon the extensive research conducted by Dr Marcell Greeff during his tenure in the mining marine shipping oil and gas and construction industries This book is a direct result of the thesis project he submitted in 2015 to obtain his Honours Degree in Business Management Bachelor of Commerce BCom supported by his Master of Science MSc project for Risk Management in the mining industry in 2013 Dr Greeff s professional experience spans multiple corporate high hazard workplaces including deep level gold mining open cast mining construction representing clients agents as well as contractors agriculture shipping and logistics deep ocean mining vessel conversions and dry docks oil and gas utilities water and electricity manufacturing factories and plants Throughout his career Dr Greeff consistently observed that organizations face challenges in designing appropriate risk management frameworks to support their safety management systems As the appointed individual responsible for corporate occupational health and safety compliance and best practices he has been directly involved in seven fatal injuries representing his employer high hazard organizations in civil court and presenting their corporate safety management system as evidence of risk management compliance His wealth of experience is grounded in practical learnings where theory is translated into practice to establish simple easy to understand and non negotiable standards Dr Greeff s empirical research for his doctoral degree identified risk management as a critical indicator component and requirement of an organizational safety management system This finding led him to include risk management in his Safety Culture Maturity Development Model which he published in his book titled The Empirical Design of a Safety Culture Maturity Development Model Greeff 2023 219 During his research Dr Greeff validated that organizations either lack appropriate risk management frameworks or struggle to design them in compliance with applicable legal requirements To bridge this gap this book presents Dr Greeff s research wherein he critically evaluates risk management literature and applies it to real world practical examples culminating in a comprehensive risk management framework tailored for high hazard industries In addition to being a valuable resource for professionals this book serves as a technical business guide for students seeking to develop a unique and suitable risk management framework for high hazard industries By integrating the latest legal requirements with best practices Dr Greeff contributes to the body of knowledge and offers a practical approach to risk management in the high hazard industry The ultimate aim is to reduce the frequency of incidents and accidents striving towards the goal of zero harm By delving into the content of this book and carefully considering its recommendations organisations can adopt the high hazard risk management framework either as it is

proposed in figure 2 or can be guided towards the development of an effective in house risk management framework The requirements for risk management as a safety culture indicator at every stage of the five stages of Safety Culture Maturity is illustrated in figure 24 while figure 25 details the actions to develop the maturity of risk management as an indicator of safety culture to reach stage 5 continues improvement which is the highest safety culture maturity

The Chemical Engineer ,2002 *The Effects of Safety Training as a Moderator for the Relationship Between Safety Climate and Process Safety* Mohamed Ali Al Mazrouei,2021 Process safety has acquired global attention in the 21st century due to its association with workplace accidents and injuries Employers and occupational health and safety OHS specialists have expressed increasing interest in enhancing process safety due to the link between poor process safety and adverse incidents such as explosions fires and chemical spills Such catastrophes can cause severe damage such as fatalities injuries property destruction environmental degradation and loss of productivity putting a significant and long term financial strain on organizations Several events have been reported in the United Arab Emirates UAE over the last decade Some of the unfortunate occurrences include the Shah Oil Field release of toxic hydrogen sulphide in 2009 in which three employees died another accident in Borouge with a boiler explosion in which one employee died and the 2017 explosion at ADNOC Refinery TAKREER facility which resulted in the loss of millions of dollars in assets Many occurrences went unreported due to internal policy fear of negative publicity litigation and the need to protect secret information Understanding the elements that influence process safety is critical for improving process safety and reducing occupational accidents and injuries As a result it is critical to investigate the process safety parameters in the context of the ADNOC refinery It is also critical to assess the impact of safety climate variables on process safety and employee perception of safety training strengthening the relationship between safety climate elements and process safety Data triangulation was used in the study which involved combining data from focus group discussions interviews and quantitative analysis The hypotheses developed on the research model were tested concurrently using SEM AMOS path modelling The findings revealed the significant and robust impact of reported top management safety commitment management safety practices and supervisory safety behaviour on process safety validating all the hypotheses The study however found little support for the safety training construct as a moderator between safety climate characteristics and process safety relationships The consequences of this study are significant for process safety practices the process industry and the oil and gas sector in general According to the findings medium and lower level employees evaluate process safety on an overall and dimensional level employee safety engagement employees safety performance and safe working environment These findings increase a manager s and an organization s management level s comprehension of how employees perceive process safety and tie this aspect to safety climate in particular and safety culture in the general workplace environment
