Molecular Consciousness Françoise Tibika, 2012-12-14 Mind and matter are connected through information at the atomic level Explains how your state of mind is profoundly related to the flow of chemical information during the interactions of your molecules Reveals how each atom of the universe is intrinsically linked with all other atoms through their memories and the information they carry Explores the concrete manifestations of this molecular consciousness such as intuition and the appearance of life on Earth The molecules of living organisms are in constant communication storing and transmitting information both at the intracellular level as well as across vast distances The mystery of how this communication occurs whether through molecular structure chemical reactions entangled states or some other method has baffled biologists chemists and quantum physicists for more than a century Revealing the intimate connections between mind and matter Fran oise Tibika explains that conscious communication exists all the way down to the very molecules of which we and the universe are made Using the fundamental laws of thermodynamics to support her argument especially the first law energy is neither created nor destroyed as well as modern scientific research in quantum physics and molecular biology Tibika explores how each imperishable atom of the universe is intrinsically linked with all other atoms through their memories and the information they carry She shows not only how each atom of your being is part of the greater whole of the universe but also how your thoughts feelings and state of mind are profoundly related to the activity of each of your molecules Just as we are undergoing constant transformation by the molecules surrounding us our own molecules are continuously transforming the network of which we are a part Exploring the concrete manifestations of this molecular consciousness such as intuition Tibika reveals how through effecting conscious change at the molecular level our actions have far reaching significance in a universe that is not blind to our presence

Be the Change Dr. Duanita G. Eleniak,2012-05-11 What happens when a forty five year old therapist goes to acting school with a group of young actors While testing her theory that the arts are the pathway to higher consciousness and a spiritual worldview the author encounters unexpected drama Art and life blur as she faces daily conflicts a brush with death life altering neurological changes and a classmates suicide Through acting she gains powerful insights about artistic endeavor and heightened consciousness above all she realizes that shifting the worldview requires following Gandhis wisdom Be the change that you want to see in the world Throughout her adventures Dr Duanita shows the reader how to co create reality enhance creativity and deepen their spiritual connection So powerful is the intention of her true story that few who read it will fail to experience a transformation of mind heart and spirit Pure Strategy Everett Dolman,2012-11-12 A stimulating new inquiry into the fundamental truth of strategy its purpose place utility and value This new study is animated by a startling realization the concept of strategic victory must be summarily discarded This is not to say that victory has no place in strategy or strategic planning The outcome of battles and campaigns are variables within the strategist s plan but victory is a concept that has no meaning there To the tactical and operational planner wars are indeed won and lost and the difference is plain Success is measurable failure is obvious In contrast the pure strategist understands that war is but one

aspect of social and political competition an ongoing interaction that has no finality Strategy therefore connects the conduct of war with the intent of politics It shapes and guides military means in anticipation of a panoply of possible coming events In the process strategy changes the context within which events will happen In this new book we see clearly that the goal of strategy is not to culminate events to establish finality in the discourse between states but to continue them to influence state discourse in such a way that it will go forward on favorable terms For continue it will This book will provoke debate and stimulate new thinking across the field and strategic studies

Non-Governmental Organisations - Performance and Accountability Michael Edwards, David Hulme, 2014-03-18 The last decade has seen some significant changes in international development and in the status of non governmental organisations operating in the field Not only has the number of NGOs virtually doubled many of them have seen a considerable growth in their budgets and have grown closer to governments and official aid agencies NGOs are acknowledged by many to be more effective agents of development than governments or commercial interests even as a magic bullet for development problems Despite these positive trends the real impact of the NGO sector is not well documented This is partly because NGO performance assessment and accountability methods are weak and partly because NGOs are caught up increasingly in the world of official aid which pushes them towards certain forms of evaluation at the expense of others This unique book takes a hard and critical look at these issues and describes how NGOs can and must improve the way they measure and account for their performance if they are to be truly effective

Storytelling Organizational Practices David M. Boje, 2014-06-20 Once upon a time the practice of storytelling was about collecting interesting stories about the past and converting them into soundbite pitches Now it is more about foretelling the ways the future is approaching the present prompting a re storying of the past Storytelling has progressed and is about a diversity of voices not just one teller of one past it is how a group or organization of people negotiates the telling of history and the telling of what future is arriving in the present With the changes in storytelling practices and theory there is a growing need to look at new and different methodologies Within this exciting new book David M Boje develops new ways to ask questions in interviews and make observations of practice that are about storytelling the future This after all is where management practice concentrates its storytelling while much of the theory and method work is all about how the past might recur in the future Storytelling Organizational Practices takes the reader on a journey from looking at narratives of past experience through looking at living stories of emergence in the present to looking at how the future is arriving in ways that prompts a re storying of the past

Agnes Sanford and Her Companions William L. De Arteaga, 2015-08-17 Agnes Sanford was arguably the most original and spiritually fruitful theologians of the twentieth century Among her achievements were the discovery and development of the inner healing ministry the development of a theology of the light of God missing in Western theology and the first ever theology of nature prayers as in stilling storms She and her husband developed a school to teach ministers and lay leaders healing and deliverance prayer and the gifts of the Spirit a decade before the charismatic renewal made such things acceptable in mainline churches In spite of these achievements she is largely ignored and unrecognized today This work examines her career and shows why her theology though deeply biblical was unacceptable to orthodox critics Sanford was part of a group who worked from the 1900s through the 1960s to make healing and deliverance prayer as normal in church They had to confront the erroneous established theology of cessationism which affirmed that the healing ministry of the church was past
